

At Lotus, we are redefining luxury small kitchen appliances with harmony, intention, empowerment, & elevation. We seamlessly blend sophistication and performance, ensuring an elevated culinary experience for those who demand the best. Our products are designed with a seamless connection between the cook and the kitchen focusing on thoughtful design with meaningful innovation. Lotus creates products that refine the craft & intuitive tools for exceptional results. We believe culinary excellence should be effortless.

THE PURIST™

Precision Temperature Kettle

Precision Temperature Control for the Perfect Brew - The Lotus Kettle is designed for those who demand precision and convenience. With both manual and pre-set temperature controls, this high-performance kettle ensures the perfect water temperature for green tea, white tea, oolong tea, black/herbal tea, coffee, and more. Featuring a customizable manual setting ranging from 104°F – 212°F (40°C – 100°C), it provides full control over brewing needs.

Double-Walled Thermal Construction for Comfort & Efficiency - Unlike standard single-wall kettles, The Purist features a unique double-wall stainless-steel design that keeps the exterior cool to the touch while maintaining water temperature longer. This thoughtful design enhances the overall experience, making every pour effortless.

Extended Keep Warm Setting for Ultimate Convenience - Enjoy hot water on demand with the Extended Keep Warm setting, allowing the kettle to keep the preferred temperature long after the initial heating.

Designed for Performance and Ease of Use – With a 1.5L capacity, this kettle is ideal for multiple servings or cooking applications.

The digital precision controls include programmable pre-set temperatures, making it effortless to select the perfect setting for different types of tea or coffee.

An audible tone signals when the desired temperature is reached, and the automatic shut-off feature turns the kettle off once the heating cycle is complete. Internal vessel markings make it easy to measure water accurately, while the removable lid allows for easy cleaning and maintenance.
