

ANSTONE WALLING PROJECT PACKS

OUR PROJECT PACKS CONTAIN 5.40M² OF MIXED SIZES OF HIGH QUALITY ANSTONE WALLING STONE.

Anstone walling products have been developed to match and blend in with the natural stone types found around the country, from the limestones of Yorkshire to the red sandstones of Scotland.

Project packs are ideal for conservatory bases, extensions and garden walls and there's **no need to order single sizes** – all you need is in one pack. This gives builders all the sizes of walling stone to produce a random pattern. The packs are also an innovative way of reducing waste on site and come in colour options.

BUILT TO CREATE RANDOM PATTERNS

TEXTURES

PITCHED

A rugged effect, in which each block has a raised centre. This is typical of quarry dressed stone.

SPLIT

The most cost-effective type of finish, for housing and landscaping, popular throughout Britain.
