Technical Specification

This brick slip is cut from a brick, manufactured to BS EN 771-1 with the following specification:

Size Tolerances - Mean & Range	T2, R1
Compressive Strength (N/mm ²):	20
Active Soluble Salts	S2
Water Absorption (% weight)	20%
Durability	F2
Gross Dry Density (Sound Insulation), Kg/m ³	1400
Equivalent Thermal Conductivity (K Value), 5% exposed:	0.71
Initial Rate of Absorption (Suction rate), Kg/m ² /min)	2.8
Reaction to Fire	A1

Size Tolerances for the cut Brick Slip may lie outside of those of the original brick.

This Brick Slip is classed as a “Clay Unit” under EU Decision 96/603/EC and therefore automatically classified A1 with no further need for testing. Corner units are cut from whole brick and therefore achieve the same classification. Some mechanical façade systems may utilise corner units comprising of bonded parts and may not achieve the A1 classification. Refer to the Technical Datasheets of the system being used or specified for further details.
