

Group Quality, Energy and Environmental Policy

Ibstock PLC is a premier UK manufacturer of clay and concrete products.

At the heart of our business is a commitment to exceed customer expectations in the quality of what we supply in terms of both products and services. We will drive quality and the continuous improvement of our products, processes and systems through the provision and analysis of performance information.

We will do this via our Tiered meeting system where objectives will be set, associated actions defined and resources provided to drive meeting these objectives.

Our employees and business partners are our greatest assets. We commit to prevent occupational injuries and ill health by consulting with and involving our employees in the provision and development of safe working conditions and systems. Eliminating hazards and reducing risks through a zero harm philosophy is the basis of this commitment.

We will comply with all applicable product, customer, legal and compliance obligations. Commitment to protection of the environment and the prevention of pollution are the first steps in this compliance.

Our products, processes and materials will be designed and procured with sustainability and energy efficiency as a focus. We will keep under review our environmental impact and constantly look for opportunities to reduce this by improving our energy efficiency by investment and adoption of new technologies and by minimising our resource use.

Sustainability is the heart of our business and will be considered in all our activities. As part of our accountability we will publish an annual sustainability report detailing our longer term objectives and progress towards these.

Safety, Quality and sustainability will be at the heart of everything we do

Joe Hudson
Chief Executive Officer
