Plain Tile	-	40	40	40	45	45
Plain Tile Vented	-	16	16	16	23	23

Vented - this is the height the fascia board should be installed above the rafter when using Forticrete ventilated eaves packs.

Non-vented - this is the height that the fascia board should be installed above the rafter if no ventilation is installed. If an over fascia vent is installed then the height of this should be deducted from the overall fascia board height.
