Ibstock Plc

Report on Payments to Governments for the year ended 31 December 2025 (the 'Report')

Introduction

This Report contains payments to Governments made by Ibstock Plc ('Ibstock') and its subsidiaries for the year ended 31 December 2025 as required under the UK's Report on Payments to Governments Regulations 2014 (as amended in December 2015) (the 'Regulations'). These Regulations apply to large UK incorporated companies like Ibstock Plc that are involved in the exploration, prospection, discovery, development and extraction of oil, natural gas deposits or other materials. This Report is also intended to satisfy the requirements of the Disclosure and Transparency Rules of the Financial Conduct Authority in the United Kingdom.

The Report is available on the Ibstock website at www.ibstock.co.uk and has been filed with the Companies House Extractives Service.

About Ibstock

Ibstock is a leading UK manufacturer of building products and solutions, backed by design and technical services that comprises two core divisions:

Ibstock Clay: The leading manufacturer by volume of clay bricks sold in the UK, with 15 manufacturing sites served by 15 active quarries. Ibstock Kevington provides masonry and prefabricated component building solutions, operating from four sites.

Ibstock Concrete: A leading manufacturer of concrete walling, flooring and fencing products, along with lintels and rail & infrastructure products. The concrete division operates from 11 manufacturing sites across the UK.

Both divisions are complemented by Ibstock Futures, which was established in 2021 to accelerate growth in new segments of the UK construction market and focuses on even more sustainable solutions and Modern Methods of Construction ('MMC') from two main locations.

Ibstock's ESG 2030 Strategy sets out a clear path to address climate change, improve lives and manufacture materials for life, with an ambitious commitment to reduce carbon emissions by 40% by 2030 and become a net zero operation by 2040.

Ibstock Plc is a constituent member of the FTSE 250 Index. For more information visit www.ibstock.co.uk.

Basis of preparation

Legislation

The Report covers the period 1 January 2025 to 31 December 2025 and relates to payments to Governments for extractive activities as defined in the above referenced legislation.

Reporting entities

This Report contains payments to Governments made by Ibstock Plc and its subsidiaries involved in the "Activities" below.

Activities

Extractive activities are defined as activities involving the exploration, prospection, discovery, development and extraction of minerals or other materials. For Ibstock, the relevant extractive categories as defined within the relevant legislation include the quarrying of stone, sand and clay. Payments made by Ibstock Plc or any of its subsidiaries to Governments arising from activities involving the exploration, prospection, discovery, development and extraction of oil and natural gas deposits or other materials (extractive activities) are disclosed in this Report.

Government

Government includes any national, regional or local authority of a country, and includes a department, agency or entity that is a subsidiary of a Government.

Project

Payments are reported at project level except those which are not attributable to a specific project, are reported at entity level. 'Project' means the operational activities which are governed by a single contract, license, lease, concession or similar legal agreement, and form the basis for payment liabilities with a Government. If agreements of the kind referred to in the definition of 'project' are substantially interconnected, those agreements are treated for the purposes of these regulations as a single project.

Payment

The information is reported under the following payment types. All payments are denoted as positive numbers and receipts/refunds are denoted in brackets.

Production entitlements

Subject to the terms of the contractual arrangements, payments are calculated on the basis of the Government's share of production (whether a Government department, agency or state-owned enterprise) under production sharing agreements. There were no reportable production entitlement payments made to a Government during the year ended 31 December 2025.

Taxes

Tax payments made on the income, production or profits of companies, but excluding taxes levied on consumption (such as VAT, personal income taxes or sales taxes).

Royalties

This category includes payments to a Government for the rights to extract minerals or other materials, typically at a set percentage of revenue less any deductions that may be taken. Any Royalty payments made in kind are also included.

Dividends

These are dividend payments other than dividends paid to a Government as an ordinary shareholder of an entity unless paid in lieu of production entitlements or royalties. There were no reportable dividend payments made to a Government during the year ended 31 December 2025.

Bonuses

These are payments for Bonuses. These are usually paid upon signing an agreement or a contract, or when a commercial discovery is declared, or production has commenced or reached a milestone. There were no reportable Bonus payments made to a Government during the year ended 31 December 2025.

Fees

These are license fees, rental fees, entry fees and other considerations for licenses or concessions paid to a Government for access to the area where extractive operations are conducted. Administrative fees, payments for permits and payments for services provided by a government have been excluded.

Infrastructure improvements

These are payments which relate to the construction of infrastructure (road, bridge or rail) not substantially dedicated for the use of extractive activities. There were no reportable Infrastructure Improvement payments made to a Government during the year ended 31 December 2025.

Cash and in-kind payments

Payments are reported on a cash basis. In-kind payments are converted to an equivalent cash value based on the most appropriate and relevant valuation method for each payment, which can be at cost or market value or such value as stated in the contract. In-kind payments are reported in both volumes and the equivalent cash value.

Materiality Level

Payments, whether made as a single payment or as a series of related payments to a Government, have been excluded from the report if they are cumulatively below £86,000 for the reporting period.

Summary Report by Country (GBP 000's)

Country	Production entitlements	Taxes	Royalties	Dividends	Bonuses	Fees	Infrastructure Improvements	Total
United Kingdom		6,421				603		7,024
Total		6,421				603		7,024
