With our last newsletter of 2021, we want to thank you for being a part of our community.

We launched in October 2020 as a COVID-relief fund and throughout this year, we've had the honor of partnering with 92 amazing organizations working to close gaps in mental health care for adolescents of color and LGBTQ+ youth.

There have been stories of great success, many featured here in our newsletters,
as well as challenges shared in what has been an unprecedented past two years.

What remains is the affirmation that mental health is important. And more so, everyone deserves access to tools and resources to promote positive mental health — particularly adolescents who face higher barriers to accessing care.

As we head into the holiday season, we wish you joy, rest, and a strong start to the new year.

With thanks,
The Upswing Fund

On December 7th, the U.S. Surgeon General, Dr. Vivek H. Murthy, released a Public Advisory: Protecting Youth Mental Health. The release of this advisory follows on the heels of a declaration of a national emergency in child and adolescent mental health in October.

We feel encouraged to see the mission of serving adolescents of color and LGBTQ+ adolescents (inclusive of all points of diversity) elevated to a
national stage by this advisory. The advisory contains recommendations and resources to help different stakeholders take action in supporting youth mental health, including Young People, Families, Educators, Health Care Professionals, and more.

Among The National SOGIE Center’s partners are Judge Baker Children’s Center, Youth Move National, and Family Acceptance Project.

Urban Health Media Project releases video introducing their Student Journalists
Urban Health Media Project, a non-profit that trains youth from under-resourced communities to produce multimedia journalism, recently released a video introducing their diverse team of student journalists. In it, they spotlight young people using media to break down barriers, address social and public health challenges, and tell the stories of their communities. Tune in to hear about these students' journeys, their aspirations for the future, and what being a journalist means to them.

Mount Sinai Adolescent Health Center publishes research on the impact of COVID-19 on inner-city female youth
The Mount Sinai Adolescent Health Center conducted a longitudinal study on the impacts of COVID-19 on young women in New York City, an epicenter of the pandemic. Through monthly online surveys, they assessed the loss of loved ones, financial impacts, social interactions, proximity to dangerous situations, and mental health impacts during 2020. Over 400 young women (ages 15 - 28) participated in this study, one of the first of its kind, providing timely insights into the unique experiences of young women in the city during the pandemic.
