Fully Automated Identity Verification

OCR Labs ©

Anyone, Anywhere, Anytime

OCR Labs is a simple way to remotely verify your customers' identity in seconds. We can verify the identity of anyone, anywhere, anytime - with just their ID and a smartphone.

We built all of our technology from scratch, and continually update it to stop fraudsters and impersonators before they can access your platform. With our unique approach to delivering ID verification - which doesn't rely on a template library or expensive human agents - we are able to protect you from iGaming industry challenges such as bonus abuse, money laundering and account takeovers without compromising on customer experience.

Like our technology, we're a global company with offices in the UK, Australia, Turkey, and the USA - so we can meet you wherever you are.

16,000+ ID documents
220+ Countries
142 Languages & typesets

Our deep learning technology allows you to securely and quickly verify your customers' information without slowing down onboarding - improving both fraud and conversion rates simultaneously.

Maximise customer conversion

Verify new users from anywhere, on any smartphone, with our fully automated solution. With no need for agent intervention and a quick, definitive outcome, you'll reduce drop-offs - especially during large-volume events.

Protect your business from bonus abuse

With our biometric verification, you can spot real, live customers making a genuine attempt to sign up - preventing people from creating multiple accounts to abuse bonus offers and reduce revenue loss.

Halt account takeovers

Quickly and securely reauthenticate users with biometric liveness, using their originally approved ID document. The entire process can be embedded in your platform for improved user experience and retention.

Meet your regulation and compliance needs

Our platform meets the most stringent privacy, security, and integrity standards - as well as covers almost every identity document in the world. Extract and verify information from the identity document against local databases to meet your KYC and AML obligations with a simple API integration.

Launch into new markets with confidence

Access instant global coverage with our 16,000+ recognised documents and 142 languages/typesets with the ability to transliterate back to your CRM language.

Get up and running with OCR Labs quickly using our secure and reliable API or dashboard. Visit ocrlabs.com to learn more or email hello@ocrlabs.com to speak with us.
