

Let's Make It:

DIY HUNTR/X Bead Keychains

Supplies:

- ☐ Perler beads in the required colors
- ☐ Square pegboard
- ☐ Printed bead template (optional)
- ☐ Tweezers (optional)
- ☐ Iron
- ☐ Parchment paper
- ☐ Heat-resistant work surface

1 Gather your beads and place the template nearby, sorting your bead colors before you begin.

2 Build from the top down, starting at the top of the character and placing one bead per peg as you follow the template.

3 Double-check your design against the template to catch any missing or misplaced beads.

4 Prepare for ironing by laying parchment paper over the design without disturbing the beads.

5 Fuse the beads with a medium-heat iron (no steam), moving in slow circles for about 20–30 seconds.

6 Once cooled slightly, flip the piece — remove the pegboard, cover the back with parchment, and iron 15–25 seconds to strengthen it.

7 Flatten while cooling by placing a heavy book or flat object on top of the finished piece while it cools completely. This helps prevent warping.

8 Display and enjoy your creation! Turn your character into a keychain, magnet or display in your room!
