

# LET'S MAKE A FAIRY FLY LANTERN!

**Materials Needed:** glass jar with a lid, paper hearts, glue, paper kitty ears, pipe-cleaners, pom poms, twinkly fairy lights, glow-in-the-dark glitter glue (optional), craft flowers (optional)

**1** To make the fairy wings take two paper hearts and decorate them anyway you want. Then glue them to the back of the jar.

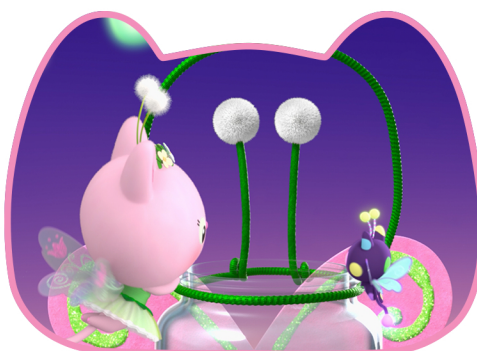

**2** Glue two kitty-cat ears to the top of the lid (optional: add some little craft flowers to make a crown)

**3** To make the deely-boppers glue one end of the pipe cleaner and stick it in to the pom-pom. Repeat so you have 2!

**4** Now take another pipe cleaner and twist your deely-boppers on right in the middle. wrap this pipe cleaner around the top of the jar and twist it on tight!

**5** To make the handle take another pipe cleaner and bend it into a "U" shape and twist each end around the pipe cleaner ring.

**6** Finally, add the fairy lights to the jar and twist the lid on tight!

**Leaping lillies! Place your fairy fly lantern in your back yard and see if any fairy flies visit!**
