

PREFACE

The fourth edition of the casebook was published in 2022 and includes cases decided through the end of October Term 2020, which finished on July 2, 2021. This Supplement is needed for a few reasons. It covers cases decided since publication of the fourth edition. Also, it is a statutory supplement providing statutory material related to each of the chapters.

We plan to do a supplement each year. Each will include the cases decided since the latest edition of the casebook was published, as well as the most recent version of this statutory material. We welcome comments and suggestions from the professors and students using our book.
