

PREFACE

Colorado Rules of Evidence with Objections furnishes readers with a complete reference of trial objections and responses. The main body of the text presents trial objections in alphabetical order, along with their corresponding responses; tabs are located on the edges of the pages to aid in locating the appropriate objection.

Cross-reference to the applicable Colorado rule(s) follows the objections and responses, and explanatory paragraphs conclude each topic. This explanatory segment alerts the reader to a practice tip or legal interpretation crucial to properly understanding the subject matter of that section.

This pocket-sized reference also reproduces the Colorado Rules of Evidence in their entirety so readers can instantly consult the rule relevant to their objection. We hope you find this material assists you in the pursuit of improving your litigation skills.
