Skills

- Technical leadership - 2 years
- JavaScript/TypeScript - 5 years
- **React** - 5 years
- Redux/Effecttor/MobX - 4 years
- Next.js/Gatsby - 2 years

Experience with ordinary backends powered by JS and Golang. Atlassian products, Notion.

Agile, PlantUML, C4.

Education

2018 - 2022

Moscow Polytech, Russia

"Web technologies",

tertiary education, bachelor

GPA: 4.5/5

Personal projects

**ATTENDANCE MANAGEMENT SYSTEM FOR ALMA MATER
NOVEMBER 2019 - JUNE 2022**

- Designed the system architecture and stack of used technologies: C4, PlantUML.
- Communicated with stakeholders to integrate the system in the real educational process
- Developed FE with the help of TS, React, Effecttor
- Built the backend side (a monolith) using NestJS and MongoDB

CONVERSATIONAL RETRIEVAL TELEGRAM BOT, JUNE 2023

Telegram bot accepts any PDF or text, embeds it and generates answers leveraged on the context of all retrieved documents.

Used: Node.js, LangChain, OpenAI, Pinecone

Work experience

TEAM LEAD

Armenotech | December 2020 - Now, HIRE

- Established a base for an engineering culture in the team: described the work process, code style, and technology strategy.
- Ensured the growing team's (started from **4**, now **12** members) climate, development, and performance aligned with defined deliverables, starting from 1-1 to PDPs.
- Communicated with external & internal stakeholders, gathered & prioritized requirements.
- Maintained hygiene of team processes, documentation, and communication.
- Developed a methodology for objectively assessing an employee's performance, taking into account both the business result and the level of competence.

SENIOR FRONTEND DEVELOPER

- Started and launched a new product from scratch & supported the existing one. **Used:** TS, React, Jotai, Tailwind.
- Launched a new back office for the whole business unit providing financial analytics with RBAC based on AntD.
- Led the development of our own platform-agnostic chart solution like the TradingView based on Canvas & SVG for Web and React Native.
- Optimized the development process by separating common modules into a private monorepo.
- Set up the error monitoring system with Telegram alerts.

LEAD FRONTEND DEVELOPER

HSE University | January - November 2020, CONTRACT

Developed an economic web game for the final stage of the International Economic Olympiad: specified requirements, designed API for BE, and built frontend from scratch. Moved intensive CPU-based tasks to WebWorkers. Optimized complex tables rendering w/ virtualization.

Used: React, Effecttor, Styled-Components, Playwright.

FRONTEND DEVELOPER

KING BIRD STUDIO | April - December 2019, HIRE

- Supported projects on React/Redux.
 - Reduced the rendering time of a complex SVG map inside a WebView from **27** seconds to **3**.
 - Bootstrapped a brand new SSR website with lots of animation, microdata, and IE support.
- Used:** Next.js, Redux, SASS, GSAP, Three.js.

This website became the winner of the Runet Prize 2019 and other awards.

FULLSTACK DEVELOPER

Tutoring empire | June - December 2018, CONTRACT

- Developed frontend for a web calendar of demo lessons.
 - Created the LMS BE for the educational center including integration with a payment service provider, SMS-pushes.
- Used:** React, Redux, Node.js, MongoDB.
