NOVEMBER 2019 - JUNE 2022**

- Designed the system architecture and stack of used technologies
- Managed the project
- Communicated with stakeholders to integrate the system in the real educational process
- Built the whole backend (a monolith)

Used: Node.js, NestJS, MongoDB, React, Effector, Styled-Components, Figma, Miro, Notion.

C4, BPMN, Story Mapping, Kanban.

Work experience

TEAM LEAD / SENIOR FRONTEND DEVELOPER

Armenotech | December 2020 - Now, HIRE

- Started and launched a new product from scratch & supported the existing one.
- Launched a new back office for the whole business unit providing financial analytics with RBAC.
- Designed an architecture for a user activity analytics system.
- Led the development of our own chart solution like the TradingView product based on Canvas.
- Optimized the development process by separating common modules into a private monorepo.
- Set up the error monitoring system with Telegram alerts.
- Established a base for an engineering culture in the team: described the work process, code style, and technology radar.
- Ensured the growing team's (started from **4**, now **11** members) climate, development, and performance aligned with defined deliverables.
- Communicated with external & internal stakeholders, gathered & prioritized requirements.
- Maintained hygiene of team processes, documentation, and communication.
- Split the team into 2 independent units and synchronized them due to business growth.

LEAD FRONTEND DEVELOPER

HSE University | January - November 2020, CONTRACT

Developed an economic web game for the final stage of the International Economic Olympiad: specified requirements, managed project, designed API, and built frontend from scratch.

Used: React, Effector, Styled-Components, Playwright.

FRONTEND DEVELOPER

LLC "KING BIRD STUDIO" | April - December 2019, HIRE

- Supported projects on React/Redux.
- Reduced the rendering time of a complex SVG map inside a WebView from 27 seconds to 2.
- Bootstrapped a brand new SSR website with lots of animation, microdata, and IE support.

Used: Next.js, Redux, SASS.

This website became the winner of the Runet Prize 2019 and other awards.

FULLSTACK DEVELOPER

Tutoring empire | June - December 2018, CONTRACT

- Developed frontend for a web calendar of demo lessons on React, and Redux.
- Created the LMS (FE & BE) for the educational center.
