

Max Speed Data Allowance explained

Once you've used your Max Speed data allowance, you can continue to use data at speeds of up to 2Mbps or 10Mbps depending on your chosen plan. Unlimited Max Speed Data plans come with unlimited Max Speed data.

Max Speed

Max Speed is the fastest speed that our network can deliver to your phone at the time and place you're using data. You can share Max Speed data with other Business First Plans. Unlimited Max Speed Data Plans are not eligible for data sharing.

Here's what you can do at speeds of 2Mbps or 10Mbps. However, these are "up to" speeds - therefore your experience will continually vary depending on many factors such as device capabilities, location, network congestion and network coverage. 2Mbps is great for browsing, social media and streaming music but is not suitable for HD video. 10Mbps is great for high definition video and video calling, but uploading large files to the web may be slow.

	2Mbps
Stream music	✓
Standard definition video	✓
Video calls	✓
Browse internet and social media	✓
High definition video	Not available
Uploading / downloading large files (eg 30MB)	Slow
Uploading / downloading very large files (eg 240MB)	Not suitable
