dormakaba expands E-Plex 7900 API support across leading access control platforms

INDIANAPOLIS, March 2, 2026 – dormakaba today announced strong integrator adoption of its E-Plex™ 7900 electronic lock, enabled by the recently launched open API. The growing roster of leading partners includes Genetec, Imron, Hartmann, and Lockt.

These partners represent a broad cross-section of the access control platforms most widely deployed across enterprise, institutional, and commercial environments. Their integrations enable seamless connectivity between the E-Plex 7900 – a reliable, budget-friendly electronic lock – and systems used across healthcare, higher education, commercial offices, government and municipal, and mixed-use facilities.

The E-Plex 7900 electronic lock is designed to deliver enterprise-grade access control at a lower cost, making it an attractive option for organizations seeking to scale door coverage while maintaining system control. By leveraging the new open Application Programming Interface (API), the E-Plex 7900 integrates directly into popular access control ecosystems, extending centralized monitoring, credential management, and event visibility to a wider range of doors and applications. The continued expansion of partners helps organizations maximize existing infrastructure investments and avoid technology lock-in.

"Customers want solutions that integrate cleanly into the platforms they already use," said Nick O'Carroll, Senior Vice President of Access Hardware Solutions and Access Channel Sales at dormakaba North America. "Along with our trusted partners, we are building momentum behind the E-Plex 7900 platform as a scalable, API-driven electronic locking solution for organizations seeking flexibility, affordability, and long-term system interoperability."

In addition, the E-Plex 7900 is soon launching a new reader option which supports Farpointe Conekt Mobile Credentials in both 13.56MHz and Bluetooth® Low Energy (BLE) and is digital wallet ready.

The company will showcase the expanding ecosystem at booth #20007 during the International Security Conference and Exposition (ISC) West 2026 in Las Vegas (March 23 - 27). Attendees can see live demonstrations of the E-Plex 7900 API and its integrations with leading access control platforms. Learn more at: <https://www.dormakaba.com/us-en/isc-west>
