

Be more efficient

With EntriWorX™ Planning

What is EntriWorX Planning?

EntriWorX Planning is a solutions-based architectural software service that reimagines access planning for better efficiency and collaboration while minimizing change orders, RFIs, and design variations.

EntriWorX Planning features specification software that enriches team collaboration throughout the design planning, specification writing and execution planning of door and access schedules - seamlessly.

This comprehensive software combined with support from dormakaba experts weave together elements of door hardware applications, door automation, and access control into a unified solution that saves time and increases productivity. This collaboration strengthens the functionality, security and quality of the door schedule system while capturing details and tracking changes along the way.

Unlock heightened performance

Collaborate with your team, trades and dormakaba opening solutions experts

Increased data accuracy with import/export processes

Enhanced schedule updating processes

Synchronize door schedules automatically

Certify component requirements

Minimize manual checks and processes

Re-number doors with ease and convenience

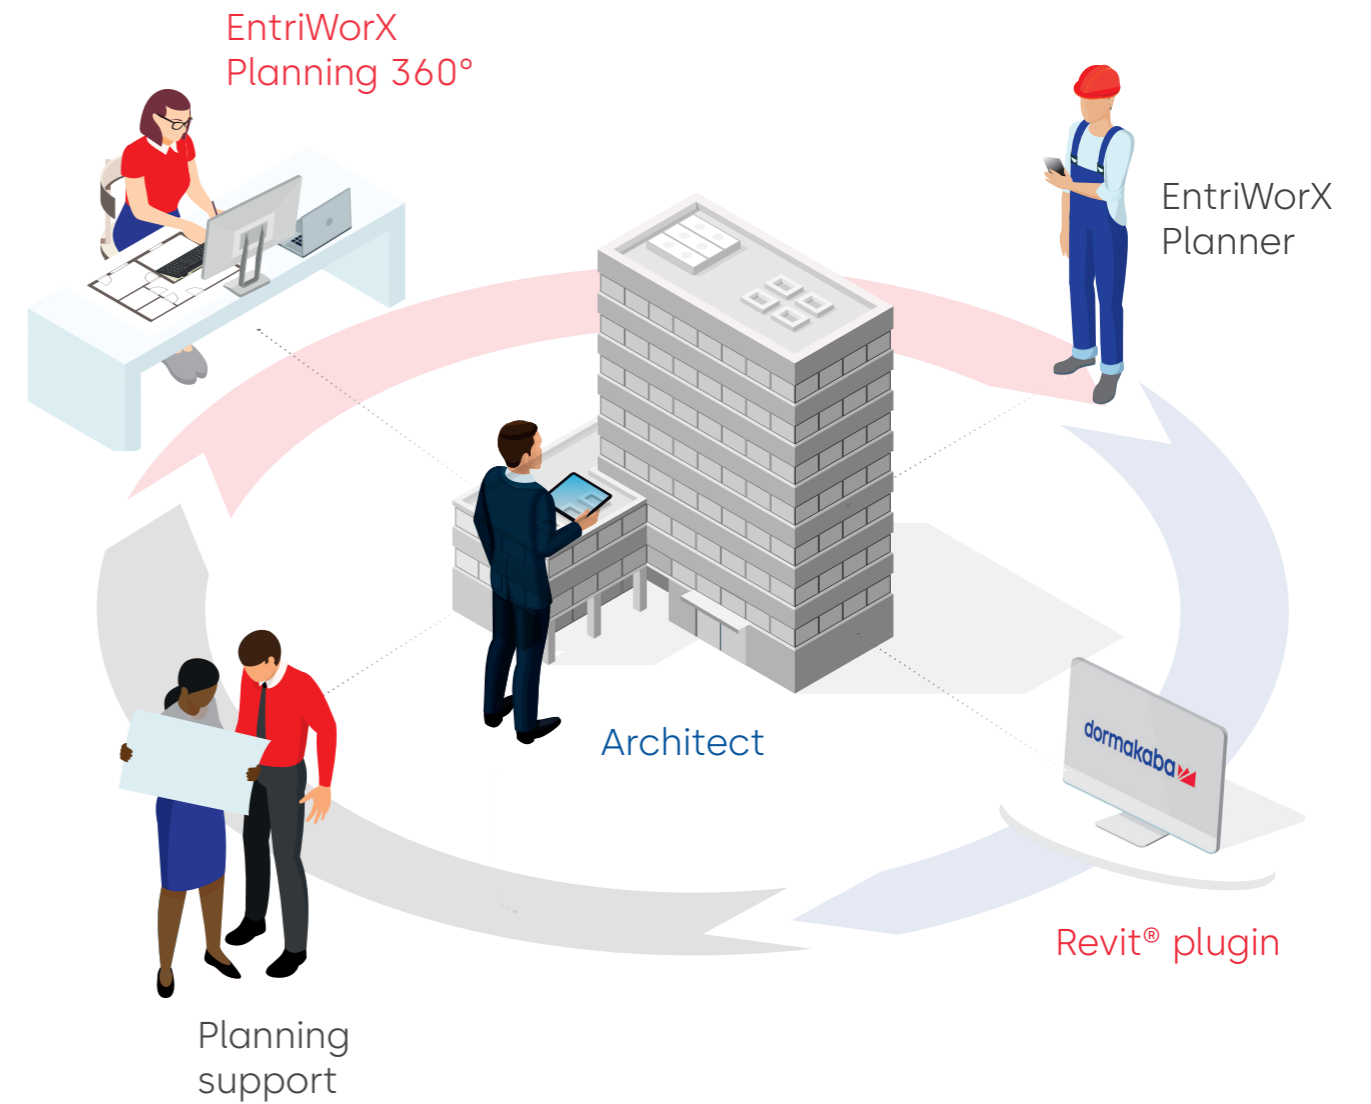

Track changes and revisions across services

How it WorX

Extensive consulting services using EntriWorX Planning 360° and EntriWorX Planner are accessed through the Revit plugin and connect you with a team of dormakaba opening solutions experts who support the project's design and execution planning by writing specifications, outlining requirements, building door templates, and tracking changes that create valuable time savings and ensure quality.

Once the door schedule is established, our team removes the burden from the design professional by compiling the various hardware sets. Specialized and dynamic software tools accelerate the process, maximizing efficiency and minimizing re-work that impacts future project phases. Enriching this collaboration recovers time for the design professional, increases transparency among trades, and prepares documents for execution planning.

EntriWorX Planning 360°

Benefits

- Design planning support from a team of opening solutions experts
- Specification writing services provided by a team of specialists
- Data access that includes drawings, electrical and wiring diagrams, and hardware components
- Conceptual planning of your door and access solutions including detail drawings and security features
- Comprehensive information about your door schedule including components, detail drawings, and overlay capabilities

EntriWorX Planner

Benefits

- Execution planning support from a team of opening solutions experts
- Services provided through specification writing to create your door schedule
- Data access that includes drawings, electrical and wiring diagrams, and hardware components
- Visualization of your door opening solution and access control including details and security features

dormakaba Revit® plugin

Benefits

- Provides a gateway to access EntriWorX Planning toolsets
- Easily installs via AutoDesk® software
- Import and export data and drawings to EntriWorX Planning toolsets
- Allows you to collaborate with a dormakaba team of opening solutions experts

Planning support

Benefits

- Team of experts provide guidance spanning the award and contract regulations for construction services
- Knowledge of local building codes, standards and regulations
- Provide comprehensive updates and training on industry best practices and advancements

Complete access to door schedule management solutions with EntriWorX Planning.
