dormakaba to feature hotel staff, guest access solutions at HITEC 2026

INDIANAPOLIS, June 8, 2026 – Hospitality access solutions leader dormakaba will showcase its latest security solutions at HITEC North America 2026, the world's largest showcase of hospitality technology, June 15-18, in San Antonio. At Booth #1838, dormakaba will demonstrate flexible, future-ready access solutions that help hospitality providers simplify operations, modernize guest access, and improve security across their properties.

"Hoteliers are being asked to choose between flexibility and simplicity. With dormakaba, you don't have to," said **Darien Long**, Senior Vice President, Specialty Access Control Solutions, dormakaba North America. "Modern hospitality environments are increasingly complex, requiring solutions that adapt to each property, technology ecosystem, and guest experience strategy. We deliver that power of choice without the complexity."

HITEC comes on the heels of Resorts World Las Vegas expanding its digital wallet guest experience to support [hotel key in Google Wallet](#), powered by dormakaba, Alliants, and LEGIC. The launch marks the first implementation of hotel key in Google Wallet on the Las Vegas Strip, enabling guests to securely access their hotel room and resort amenities using the devices they already carry. Behind the scenes, LEGIC's neon technology provides the secure mobile credential foundation for the Google Wallet experience at the resort, enabling seamless provisioning and secure lifecycle management of digital room keys without adding complexity to the guest experience.

Resorts World Las Vegas has continued to expand its digital access strategy, including its earlier [launch of room key in Apple Wallet](#). Guest adoption continues to grow across the resort's digital wallet offerings, with nearly 30% of guests arriving at Resorts World last month using digital keys and 80% of guests who completed check-in adding a digital key at that time. This transition not only reflects the increasing demand for seamless, contactless interactions but also offers sustainability benefits by reducing reliance on traditional paper and plastic.

Additional dormakaba technologies at HITEC 2026 include:

dormakaba Staff Key Validator

Staff Key Validator is a keycard management solution that simplifies operations and increases security. It uses multi-layer, PIN-based authentication to reduce the front-line workload typically associated with staff keycard management and mitigate the risk posed by lost, stolen, or shared keycards.

dormakaba Ambiance™ Cloud Access Management Software

Ambiance Cloud is a powerful, cloud-based access management software designed to simplify and streamline hotel operations. Whether managing a single hotel or multiple properties, Ambiance Cloud gives properties full control over guest and staff access, room locks, perimeter security, and more – from anywhere, at any time.

Perimeter Access Solutions

dormakaba Perimeter Access solutions provide flexible, scalable, and centralized access control. From lobby entrances and staff-only corridors to elevators, parking gates, amenity spaces, and restricted back-of-house areas, the solutions work with Ambiance Cloud to help secure guests, operations, and properties.
