

Hospitality access solutions

For every place that matters

From welcoming entrances to secure guestrooms, dormakaba provides trusted solutions that enhance the guest journey and simplify operations.

Solutions for:

- Lobby
- Elevators
- Guest rooms
- Spa
- Gym
- Pool
- Parking garage
- Meeting rooms
- Restaurants
- Offices
- Back-of-house and more

How we help hotels

- Deliver smoother arrivals and mobile-ready guest access
- Enhance guest experience with seamless, contactless access
- Simplify daily operations with consistent standards across properties
- Manage guest and staff access securely while optimizing flow
- Ensure life safety, ADA accessibility, code compliance and improve energy efficiency
- Protect against keycard cloning and cyber risks with advanced credential technology
- Reduce long-term operating costs with durable, upgradable systems

dormakaba supports hotels from design planning to operation

- New construction and renovation – Early planning and specification guidance ensure the right solutions are selected, coordinated, and compliant with ADA requirements and building codes, reducing risk and simplifying delivery

- Upgrades and retrofits – Modernize existing systems with flexible options that improve security, extend product life, and minimize operational disruption
- Ongoing service, maintenance, and support help improve reliability while protecting long-term performance and value

Complimentary specification and design planning

- Specification consultation and coordinated planning across Divisions 8, 10, 11, and 28; one-stop-shop guidance from design through construction to avoid errors and ensure life and brand safety compliance
- EntriWorX™ BIM Plugin for Revit® – Streamline door schedules and save design time without modifying original Revit files
- Owner standards – Support ownership groups with writing and updating Owners Standards Manual (OSM), creating specification consistency

- Take-offs – Precise door-by-door mapping simplifies RFID electronic lock bidding and installation planning

Service and installation

- RFID electronic lock system – Centralized technical support and service plan options
- Automated entrance systems – Our local service branches install, repair, and modernize automatic sliding doors, ADA operators, and revolving doors across multiple brands. dormakaba uniquely services both our own systems and those from other manufacturers, along with related entrance hardware, to keep hotel entries safe, compliant, and reliable
- Warranty and service plans – Standard coverage with upgrade options
- Certified installation and commissioning – Reliable install and setup for RFID locks, mobile access and software
- Maintenance and repair – Keep systems running smoothly and extend life cycle value

Automated entrance systems

Sliding, swinging and revolving doors, ADA operators, touchless sensors, turnstiles, speed gates, event gate pedestal scanners and pedestrian interlocks

Where: Main entrances, vestibules, side/service doors, restrooms, conference/event centers, and high-traffic zones like buffets and pools

Why: ADA-compliant, touchless entries that improve flow, enhance guest experience, and reduce staff workload

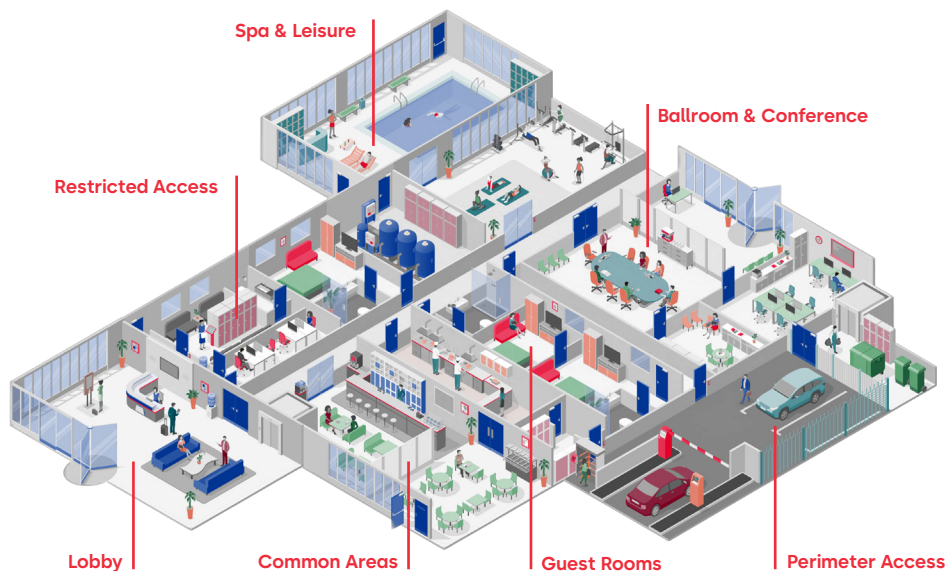

RFID electronic access management system

RFID locks, wall readers, elevator readers, and mobile key capabilities — all managed through Ambiance™ software with flexible deployment options

Where: Entrances, guestrooms, elevators, amenity spaces, garages, exterior access points, and staff/back of house areas

Why: Creates a smoother guest journey from arrival to room access while improving staff efficiency. Supports fast check-in, mobile credentials, and secure property-wide access with centralized visibility. Modular, upgradable technology reduces maintenance, protects the guest experience, and keeps security current

Integrations: Integrates with PMS, kiosk check-in, GRMS, mobile apps, elevator systems, and parking platforms to help create a more connected guest journey

Movable Wall and Interior Glass Systems

Operable partitions, vertical lift systems, and interior glass solutions that allow spaces to open, close, or transform, balancing openness, privacy, and sound control

Where: Lobbies, conference rooms, restaurants, retail, and amenity spaces

Why: Modern, flexible layouts support both new builds and renovations and adapt to different uses—from meetings to dining—while balancing space, natural light, privacy, and sound control with reliable, long-term performance

Door hardware

Closers, exit devices, hinges, electric strikes, maglock kits, mechanical locks, keys and cores, and fire/life safety devices

Where: Guestroom corridors, stairwells, storage, back-of-house, and service areas

Why: Durable hardware designed to meet safety and accessibility standards, extend lifecycle value, and simplify rekeying. While most guest access is moving to RFID/mobile for centralized management, high-quality mechanical hardware and hard keys remain preferred for some areas
