PAINT CARE TIPS

1. Always store paint in a cool, dry place. Extreme temperatures, such as freezing or above 120 °F, can cause pigment settling and viscosity changes that may make the paint unusable.
2. Opened paint containers should be used within 6 months. Unopened paint containers may be stored for up to 2 years. If opened at the end of the shelf life (2 years), the paint should be used as quickly as possible.
3. To prevent cross contamination of the paint, which may cause it to degrade and spoil, follow these steps:
 - a. Pour amount of paint to be used into smaller, resealable containers. And be sure to use fresh water to clean your brushes when working out of the smaller containers.
4. Always be sure to close cap/lid tightly after each use and to permanently remove and dispose of any seal on the container or in the cap/lid.

- b. Do not pour used paint back into the original container.
- c. Do not dilute product in the original container.
- d. Do not dip brushes or other applicators into the original container. By following these steps, if contamination occurs, only a small amount of paint will be lost, not the entire container.

Speedball® Ceramic Underglazes Class Packs

Cone 06–10 (1855°–2381°F)

Bright, intense colors that are highly saturated for spectacular results, these underglazes are compatible with Speedball Earthenware Glazes, and can be used for a variety of decorating techniques. They may be applied to greenware or bisque and can be blended. The liquid, opaque colors will not move or bleed, making them perfect for detailed painting, design work, and sgraffito. Because they're lead-free and clean up easily with water, they're ideal for classroom use. These underglazes are dinnerware safe when used and fired as directed. However, tableware producers should have finished ware lab tested to determine dinnerware suitability due to firing variances and contamination. Colors can be assorted for quantity pricing.

The colors can be layered without bleeding, and they won't flow when fired, so they're great for details. One coat results in a translucent look; use three coats for an opaque look. Choose Teacher's Palette in gallons for larger projects and greater savings. Available in a wider range of colors, Teacher's Palette glazes may appear brighter and more intense, depending on the number of layers applied. All food safe. Colors can be assorted for quantity pricing.

Blick® Essentials Gloss Glazes

Cone 06–05 (1828°–1888°F)

Blick Essentials Gloss Glazes come in a variety of bright, true colors that can be intermixed to create an infinite palette of colors. Non-toxic, non-hazardous, and food safe, these glazes glide smoothly onto bisque, with a self-leveling formula that eliminates brushstrokes from the fired finish. They dry quickly, speeding up handling time and allowing for the application of additional decoration. They also won't dissolve or pick up previous coats of glaze. Because they fire to a high-gloss finish, no clear glaze is required. ACMI-certified. Pints.
