Berkeley

The Essential Matboard for Production + Decorative Framing

Berkeley offers the most extensive matboard range designed to support a wide range of non-conservation framing applications. With flexibility across size, core, and surface options, it's the ideal solution when conservation isn't required—but presentation still matters.

Berkeley Matboard

A complete matboard solution designed to deliver range, flexibility, and consistency across decorative and production framing—all within one streamlined offering.

Components

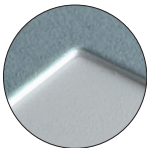

The surface, core, and backing are all buffered with calcium carbonate. This creates an acid-neutralized board with a 3-5% alkaline reserve to help slow future acid formation.

Recommended for:

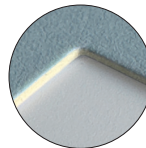

Production and contract framing, open edition prints, posters, and a wide range of decorative artwork.
