

Corkboard Mouse Pad

Since you look at your mouse pad every day, sketch a design that is uniquely “you” and will inspire you.

HOW TO MAKE IT

STEP 1

Lay a piece of Saral Wax Free Transfer Paper over your drawing, then trace your design so it transfers to the paper. Lay the transfer paper on your corkboard and trace the design again to transfer it to the corkboard.

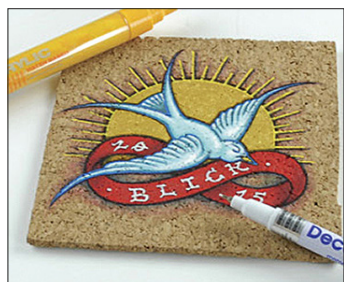

STEP 2

Lay a piece of Saral Wax Free Transfer Paper over your drawing, then trace your design so it transfers to the paper. Lay the transfer paper on your corkboard and trace the design again to transfer it to the corkboard.

STEP 3

Use a black ball point pen to trace over your design one more time to make it easier to color.

STEP 4

Bring your design to life by adding color. Have fun with it ... the bolder and brighter the colors, the better! Use and enjoy.
