The Level 6 Cap is classed as an Ultra Wide Fat Cap and offers the largest spray output for the Montana GOLD low pressure cans. Clearly a fat cap, the Level 6 cap sprays lines of 5cm to 25cm on average.

PRODUCT INFORMATION "MONTANA LEVEL 6 CAP"

The complete Level Cap system was developed by Montana Cans to compliment the exceptional characteristics of the low pressure, Montana GOLD. The Level 6 Cap is classed as an Ultra Wide Fat Cap and offers the largest spray output for the Montana GOLD low pressure cans. Clearly a fat cap, the Level 6 cap sprays lines of 5cm to 25cm on average. The Level 6 cap can achieve the largest spray output in the fastest possible time over large surface areas.

The ultimate fill in cap for graffiti, street art and urban art, the Level 6 cap applies color with moderate to spray mist subject to wind conditions. The Level 6 cap fits female valve cans and can also be used with great results on the Montana BLACK and Montana WHITE can ranges. D.I.Y and arts and crafts project makers need to be aware that this cap is only for larger surface areas only. Applying to small projects will result in excessive paint application or drips.

Often turned to by graffiti artists as the fastest filling cap for artworks that need to be completed in a short period of time, the LEVEL 6 caps is the king of fat caps. The spray width changes as the distance of application to the substrate changes. For fatter or broader lines, spray from a further distance. Please note, due to higher paint output, using Fat Caps may result in dripping or excessive paint application in some contexts.
