

# HOOP PAINTING FUN BAG

## Using Dye-Na-Flow paint:

All colors can be intermixed to achieve a variety of colors. Also, 25% water can be added to the colors to create different tones.

## Using Silk Salt:

Paint hoop (or desired area on hoop) with Dye-Na-Flow. Sprinkle Silk Salt lightly on top while the paint is still wet. Let it dry completely. Then, brush off the salt to see the starburst effect.

## Using Water-based resist:

The permanent gold water-based resist in this kit is used to hold the paint within an area. It is ready to use from the bottle. Shake well before using! Note: To get a good image, the resist line must be unbroken or paint will seep out of the area. Practice on a piece of paper first.

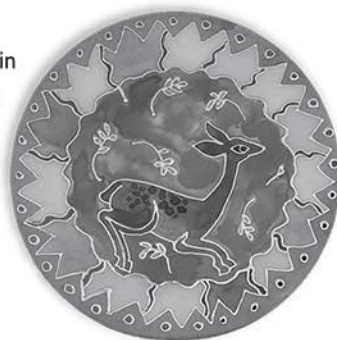

## Two options to add a design:

- Lightly draw a design on the hoop with a pencil, Jacquard's Auto Fade Pen (which will disappear when touched with water) or paint. Then, trace over the design using the water-based resist.
- Place the hoop over a design, and trace the outline using the water-based resist.

After the water-based resist is dry, it is time to paint. It's as simple as filling in the areas! The gold resist can be used for accents, such as dots and swirls, over the top of the painting. Other options include: a sun print\*, writing a name or writing a message.

## \*Sun printing:

1. Using a brush, thoroughly wet the silk hoop fabric with clean water.
2. Apply Dye-Na-Flow paints - any color(s).
3. While the fabric and paints are wet, arrange stencils, leaves, feathers, or other flattened items onto the surface. Quickly smooth the items down so they are in contact with the wet fabric. Silk Salts may be added, to create starburst effects.
4. Place the hoop, lying flat, in a sunny location.
5. After the paint has thoroughly dried, remove the items from the fabric and brush off the salt (if added).
6. The dye will be darker in areas that were exposed to the sun!
7. The paint can be 'fixed' by ironing with a hot iron; however, the hoops will not be washed, so it is not necessary.

*Dye-na-Flow*® is a free-flowing, concentrated liquid color for use on any untreated fabric. It will spread on fabric until it is thoroughly absorbed and even. Every fabric has a different flow and spread. It is magical on silk, but works on any type of fiber; natural and synthetic. On silk it has an even luster. On velvet it is rich. It doesn't alter the feel of the fabric.

Dye-Na-Flow is incredibly versatile. It's perfect for silk painting, including the serti technique with resist, spray on tie dye, watercolor, airbrushing, salt technique, spritzing through stencils, sponge printing and simplified batik or wax resist effects.

**Available in 30 colors!**

## SIZES:

- 2.25 fl oz/66.5 ml (Item JAC1)
- 8 fl oz/237 ml (Item JAC2)
- 32 fl oz/.95 L (Item JAC3)
- 1 gal/3.79 L (Item JAC4)

Also available:

**JAC9923 - 6 Color Set**  
(6 - 1 fl oz/29 ml flip-top bottles)

**JAC9908 -Exciter Pack**  
(9 - 1/2 fl oz/14 ml bottles)

**JAC9922 Mini-Exciter**  
(8 - 1/2 fl oz/14 ml bottles)
