

Marbelized Phone Case

Pebeo Fantasy paint reacts with itself to create a trendy marble look and a rock-hard, high-gloss finish.

HOW TO MAKE IT

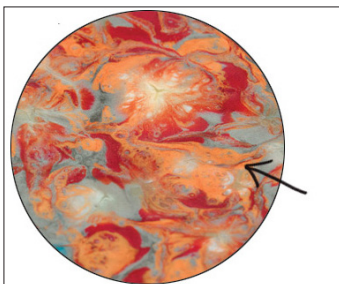

STEP 1

Apply a single coat of paint to a solid color phone case.

STEP 2

Apply random droplets of a contrasting color with a brush or plastic dropper.

STEP 3

Repeat the process with as many colors as you want. Use a toothpick to marbleize.

STEP 4

Allow the case to dry for several hours before using with your cell phone. Try this technique with sunglasses, too!
