DANIEL SMITH Luminescent™ Watercolor

WHAT ARE THE DIFFERENCES BETWEEN THE 4 TYPES OF LUMINESCENT WATERCOLORS?

Iridescent: Reflection – particle of light hits paint/pigment matrix and bounces back. Much like a mirror. | **Interference:** Refraction – particle of light enters the paint/pigment matrix and scatters light. | **Duochrome** is one pigment that bounces between two colors. | **Pearlescent** adds opalescence – like an opal or pearl – to the color it's mixed or glazed with.

DANIEL SMITH EXTRA FINE™

GOUACHE

DANIEL SMITH Extra Fine™ GOUACHE is a professional artist grade water media that produces an opaque matte finish. Made with the same high-quality pigments and gum arabic as **DANIEL SMITH Extra Fine™ Watercolors**, **DANIEL SMITH Extra Fine™ GOUACHE** is uniquely formulated with higher pigment loads to achieve density and opacity without adding whites or other fillers.

Whether your painting style is abstract, representational, illustrative or figurative, you'll enjoy the creative versatility of **GOUACHE**. Apply it as mass tone straight from the tube to get rich, full-bodied solids with single brush strokes. Temper colors smoothly with water to create softer lines and hazy layers. Mix and blend new shades to customize your palette. You can even scrape into it or build up light texture with mark-making tools.

Use **DANIEL SMITH Extra Fine™ GOUACHE** alone or to accent your watercolor paintings with velvety shadows or bold pops of color. Try it with a wider variety of brushes on either light or dark surfaces – explore a whole new world of artistic expression!

- 22 richly saturated colors; 17 are single pigments
- Exceptional lightfastness and pure, natural opacity
- Full range of staining and lifting qualities
- Rewets, dilutes and cleans up easily with water
- Available in 15ml tubes; add colors to empty half-pans for portability
