

**Utrecht Art Supplies**

**Product Profile: Phthalo Blue (green shade) Artist's Acrylic**

- Phthalo Blue (green shade)
- Category: Acrylic dispersion artist's color (water-based)
- Pigment type: Synthetic Organic Phthalocyanine
- Transparency/opacity: Transparent

Utrecht Phthalo Blue (green shade) is a highly concentrated, transparent blue that is among most versatile primaries in our assortment. Phthalo blue (green) can be used as the single primary blue on the palette, and is an excellent companion to Ultramarine for a complete warm/cool range.

Straight from the tube (mass tone) Phthalo Blue is intense and dark.

This highly transparent color offers intense chroma and great optical clarity in glazes.

Mixed with white, Phthalo Blue (green) reveals a characteristic range from midnight to sky blue.

Mix with white to create a versatile high-chroma opaque primary.

Can be used to create a full spectral range from blue through the entire green range to yellow. Blend with crimson or magenta for interesting half-chromatic violets.
