

How to Paint Watercolor Citrus with Fabriano Artistico Watercolor Paper

Learn to paint vibrant citrus slices using Fabriano Artistico Watercolor Paper, a luxurious, bright white surface that makes colors pop.

HOW TO MAKE IT

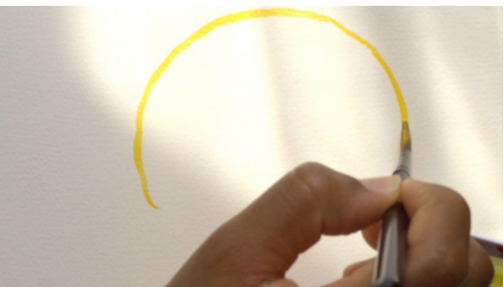

Step 1

Wet your round Raphael brush (Size 4 or 6).

Step 2

Start with Lemon Yellow on your palette, then add a touch of Carmine or French Vermillion to create a few variations of yellows and oranges.

Step 3

Begin to paint a circle with Lemon Yellow.

Step 4

With a slightly different shade, wet your brush again and create a triangle with rounded edges, starting from a point in the middle—similar to a pizza slice! Remember to leave some small gaps of white in between the slices.

How to Paint Watercolor Citrus with Fabriano Artistico Watercolor Paper

Step 5

Fill in the triangles using straight brush strokes, leaving small spaces in between strokes. Leaving the white of the paper gives contrast and makes the fruit look more appetizing!

Step 6

Continue to create more overlapping circles and fill in each "pizza slice" triangle shape within each circle.

Step 7

Create as many slices and color variations with the Lemon Yellow, Carmine, Alizarin Crimson, French Vermillion, and Venetian Red colors. You'll find endless variations within these colors to make red, orange, yellow, and pink!
