MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The tobacco consumption in China has been slightly affected by the austerity measures implemented by the Chinese Central Government. In the first half of 2014, volume of tobacco sales dropped mildly by 0.07%, which was the first half year recorded a drop for the past decade.

On the other hand, the product mix for tobacco products continued to improve in the first half of 2014. The shift of product mix towards mid and high end products has caused an increase in sales value of tobacco products by 7.4%.

During the Reporting Period, the Group's turnover decreased by 6.6%. This is due to an improvement in the Group's product mix, which resulted in less volume but higher margins. The Group's gross profit margin increased from 30.3% in the first half of 2013 to 30.9%. This was due to the overall improvement in product mix as well as productivity improvement and cost reduction initiatives. As a result, the Group's underlying net profit increased from HK\$190 million in the first half of 2013 to HK\$225 million in the first half of 2014.

Due to the weakening of Renminbi against Hong Kong dollars, there was an exchange loss of HK\$35.2 million (first half of 2013: exchange gain of HK\$14.7 million), consequently the reported net profit dropped by 7.5% from HK\$205 million to HK\$189 million.

Given the Group's strong financial position, the Board has declared a special dividend of HK4.1 cents per share in addition to an interim dividend to return a portion of excess cash to shareholders.

FINANCIAL REVIEW

Turnover

During the Reporting Period, the Group has recorded a lower turnover of 6.6% from HK\$1,874 million to HK\$1,751 million. This was mainly due to an improvement in product mix which resulted in decline in sales volume. However, product prices in general remain stable.

Gross Profit

For the first half of 2014, with the aggressive cost saving efforts together with an improvement in product mix, the overall gross profit rate improved by 0.6 percentage points when compared to the same period of last year to 30.9%. But due to the lower turnover, the absolute value of the gross profit decreased slightly from HK\$568 million to HK\$542 million.

Other Income

The increase in other income was mainly due to more interest income recognized in the first half of 2014 in accordance with an increase in average bank balances over the Reporting Period when compared to the same period of last year.

Operating Cost

Operating costs increased by HK\$19 million from HK\$223 million in the first half of 2013 to HK\$242 million in the first half of 2014. The increase was mainly due to exchange losses on revaluing borrowings denominated in Hong Kong dollars against the depreciating Renminbi. Excluding such exchange loss, the actual operating costs reduced by about HK\$16 million to HK\$207 million in the first half of 2014. Such reduction in operating expenses was achieved through tighter cost control in spite of inflationary pressure. As a percentage of turnover, the operating costs (excluding exchange loss) decreased to 11.8% in the Reporting Period from 11.9% in the same period of last year.

Finance Costs

Finance costs increased slightly from HK\$31 million in the first half of 2013 to HK\$33 million for the Reporting Period. The increase was mainly due to an increase in bank borrowings as the unutilized banking facilities were fully drawn down since April 2013.

Share of Profit of Associates

Share of profit of associates was HK\$19 million in the first half of 2014, which rose marginally by 1% when compared to the same period of last year. Such rise was encouraging as the declining profit trend of our Nanjing Plant was stabilized in the Reporting Period.

Taxation

The effective tax rate of the Group remained stable at 36% in the first half of 2014. Such rate was higher than the statutory tax rate due to the incurrence of certain non-tax deductible expenses.

Profit Attributable to Owners of the Company

The Group achieved a profit attributable to owners of the Company of HK\$189 million during the Reporting Period, representing a decrease of 7.5% as compared to HK\$205 million in the first half of 2013. The decrease was mainly due to an exchange loss (first half of 2013: exchange gain of HK\$14.7 million). Excluding the impact of exchange differences, the Group's underlying net profit increased by 18.2% from HK\$190 million to HK\$225 million, in spite of a slight drop in turnover. This was mainly due to an improvement in margins and better cost controls.

Segmental Information

During the Reporting Period, substantially all the turnover was derived from printing of cigarette packages.

Financial Position

As at 30 June 2014, total assets of the Group amounted to HK\$6,982 million and its total liabilities amounted to HK\$2,794 million, representing a decrease of HK\$229 million and HK\$247 million, respectively as compared to 31 December 2013. Both total assets and total liabilities decreased since cash was used to pay down the bank borrowings and other payables during the Reporting Period.

Borrowings and Banking Facilities

As at 30 June 2014, the Group had gross interest-bearing borrowings of approximately HK\$1,839 million (31 December 2013: HK\$1,978 million), representing a decrease of HK\$139 million over the last year end. The reduction was due to the repayment of bank borrowings during the Reporting Period.

All of the interest-bearing borrowings are unsecured, denominated in Hong Kong dollars and bear interest at floating rates. The maturity profile of the Group's gross interest-bearing borrowings is as follows:

	30 June 2014 HK\$'000	31 December 2013 HK\$'000
On demand or within one year	589,262	437,384
In the second year	1,249,290	741,693
In the third to fifth years, inclusive	–	798,431
	1,838,552	1,977,508
Less: Amount due for settlement within 12 months (shown under current liabilities)	(589,262)	(437,384)
Amount due for settlement after 12 months	1,249,290	1,540,124

As of 30 June 2014, the Group did not have any committed and undrawn banking facilities (31 December 2013: Nil).

Capital Structure

As at 30 June 2014, the Group had net assets of HK\$4,188 million comprising non-current assets of HK\$3,760 million, net current assets of HK\$1,693 million and non-current liabilities of HK\$1,265 million.

Gross gearing ratio, measured by total interest-bearing borrowings as a percentage of equity, decreased from 47.4% as at 31 December 2013 to 43.9% as at 30 June 2014. The gross gearing ratio decreased as bank borrowings were paid down according to the repayment schedule during the first half of 2014.

Charges on the Group's Assets

As at 30 June 2014, assets with carrying amount of approximately HK\$2 million (31 December 2013: HK\$5 million) were pledged to customers in respect of quality assurance of products produced.

Contingent Liabilities

As at 30 June 2014, the Group did not have any significant contingent liabilities (31 December 2013: Nil).

Capital Commitments

As at 30 June 2014, the Group had capital commitments contracted but not provided for in respect of acquisition of property, plant and equipment of HK\$22 million (31 December 2013: HK\$43 million).

Working Capital

The current ratio decreased from 226% at last year end to 211% at 30 June 2014 due to repayment of bank borrowings and more bank borrowings fall due within one year.

Foreign Currency Exposure

During the Reporting Period, the Group's business transactions were mainly denominated in Renminbi. All bank borrowings were denominated in Hong Kong dollars.

The Group has foreign currency exposure on Hong Kong dollars related to its bank borrowings.

Treasury Policies

The Group adopts a prudent approach with respect to treasury and funding policies, with a focus on risk management and transactions that are directly related to the underlying business of the Group.

MATERIAL ACQUISITION AND DISPOSAL

During the Reporting Period, there was no material acquisition and disposal of subsidiaries or associated companies by the Group.

REMUNERATION POLICIES AND EMPLOYEE INFORMATION

As at 30 June 2014, the Group had 2,369 full time employees in Hong Kong and the PRC. Total staff costs (including directors' emoluments) amounted to HK\$160 million (six months ended 30 June 2013: HK\$169 million) for the Reporting Period. The Group's remuneration policies are consistent with the one that was disclosed in the annual report of the Company for 2013.

PROSPECTS

The tobacco industry remains to be an important contributor to the Chinese Government in terms of both tax revenue and employment. The management considers the impact of the austerity measures on the tobacco industry will be temporary during this transition. With the continuous improvement in product mix, the management anticipates the tobacco market in China may resume its normal growth rate in terms of sales value in the very near future.

With the recent rationalization in tendering practices, and the efforts spent on cost savings and productivity improvements, the Group's gross profit margin was stabilized during the Reporting Period. Operating results have improved. With a more stable operating environment as compared to the past years, the management is cautiously optimistic about the prospects of the tobacco packaging market. AMVIG, as a company run by professional managers, will be benefited from a more transparent market going forward.

In addition to organic growth, the management has been actively pursuing value added acquisitions. The management expects the tobacco packaging market will consolidate further, albeit at a slow pace, as smaller players may exit.

Once again, we would like to take this opportunity to thank our shareholders for their unfailing support to the management in the challenging environment.
