

Empowering a better future for pets and people

Petstock Foundation is a registered charity supporting organisations across Australia that strengthen the bond between pets and people.

Our work focuses on three key impact areas: **Disadvantage**, **Assistance Animals**, and **Rescue**.

We partner with trusted organisations to create practical, meaningful change for pets, individuals and communities.

Disadvantage

We support individuals and communities **experiencing economic or social disadvantage**, recognising that hardship affects both people and the pets they care for.

Assistance Animals

We help increase access to **service, assistance and therapy animal programs** that improve independence, connection and quality of life.

Rescue

We work to reduce the number of pets entering rescue and to **strengthen the capacity of rescue organisations**.

Our Purpose

We believe pets make lives better – and we are committed to improving outcomes for pets, their people and the communities they live in. **Together, we empower a better future for pets and people.**
