

CEVT AB – Quality Policy

CEVT is an innovation center creating mobility solutions for a different tomorrow. Our products include world leading architecture development, technology development, data science and engineering services. As an established actor in the field of people mobility; we take a big responsibility in making sure our products and services are a good fit to the needs of society. We are always committed to design high quality processes that deliver in tune with our customers' needs and expectations. All CEVT employees have a responsibility to apply below principles and to integrate quality in everything we do.

Key Principles for CEVT quality:

- **We Innovate**

We are driving the development of desirable products and services for future mobility.

- **We are customer-oriented**

We focus on the customers, are responsive to their requirements and help them to meet society's norms and legislations.

- **We attract and retain talent**

We are constantly eager to attract new talented colleagues that bring dynamic diversity of thoughts. We reward those who share knowledge and make an effort to teach others.

- **We continuously improve our business**

We are committed to always improve the way we work. We set challenging goals, and follow up on performance. We learn from successes and mistakes.

Our competences' and ability to innovate makes us the world leader in the development of future mobility solutions. It enables us to be the most valued partner for any OEM.

Mats Fägerhag

CEO, CEVT AB
