Phone #: _____

Approximate number of swine: _____	Special instructions and/or other animal identification (optional):
Location of animals: _____	

Indication: For the control of swine respiratory disease (SRD) associated with *Actinobacillus pleuropneumoniae* and *Pasteurella multocida*.

Dosage: _____g/ton (must be 181 to 363 g/ton) **Duration of Feeding:** 21 Days

Use of feed containing this veterinary feed directive (VFD) drug in a manner other than as directed on the labeling (extra-label use) is not permitted.

Reorders (refills) are not permitted with this VFD drug.

The expiration date for a tilmicosin Veterinary Feed Directive (VFD) for swine must not exceed 90 days from the time of issuance.

Caution: Do not allow horses or other equines access to feeds containing tilmicosin. The safety of tilmicosin has not been established in male swine intended for breeding purposes.

Feed containing tilmicosin shall not be fed to pigs for more than 21 days during each phase of production without ceasing administration for re-evaluation of antimicrobial use by a licensed veterinarian before re-initiating a further course of therapy with an appropriate antimicrobial. Do not use in any feeds containing bentonite. Bentonite in feeds may affect the efficacy of tilmicosin.

RESIDUE WARNING: Swine intended for human consumption must not be slaughtered within 7 days of the last treatment with this drug product.

Combination Feeding with Other Drugs:

This VFD only authorizes the use of the VFD drug(s) cited in this order and is not intended to authorize the use of such drug(s) in combination with any other animal drugs.

VFD Issuance Date: _____

VFD Expiration Date: _____
Month/Day/Year
(Not to exceed 90 days from issuance date)
