

250 Doses
250 mls

**Porcine Reproductive &
Respiratory Syndrome Vaccine,
Respiratory Form,
Modified Live Virus**

***Prevacent*[™] PRRS**

For use in animals only

Indications: This product has been shown to be effective for the vaccination of healthy pigs 2 weeks of age or older against PRRS disease, respiratory form. A 26-week duration of immunity has been established. For more information regarding efficacy and safety data, go to productdata.aphis.usda.gov.

This product has not been tested in pregnant animals. For use in PRRS virus positive herds only. Not for use in breeding age boars.

Dosage and administration: Rehydrate with the accompanying sterile diluent. Shake well and draw back into the syringe the required amount. Administer 1 mL intramuscularly. The need for annual booster vaccinations has not been established for this product; consultation with a veterinarian is recommended.

Precautions: Store at 2°-8°C (35°-46°F). Do not freeze. Use entire contents when first opened. Do not mix with other products, except as specified on this label. In case of human exposure, contact a physician. Do not vaccinate within 21 days before slaughter. Vaccine virus may shed and spread to non-vaccinates. The duration of potential vaccine virus transmission may vary. Inactivate unused contents before disposal. Anaphylactic reactions may occur. Symptomatic treatment: Epinephrine. Contains gentamicin as preservative.
