

AviPro®

MG F

Description: *Mycoplasma Gallisepticum* vaccine:
F strain, live culture

Directions for use: This vaccine is recommended for drinking water use at 12 weeks of age or older but not later than 4 weeks prior to the onset of egg production. Vaccinate only healthy birds. Do not use antibiotics within 3 days before or after MG vaccination. Do not use Newcastle Disease or Bronchitis vaccines within 7 days before or after MG vaccination. Do not vaccinate turkeys. Avoid contact with vaccinated chickens.

Recommended Preparation and Directions of Vaccination:

Do not mix the vaccine until ready for use. Remove disinfectant, sanitizers and antimicrobials from the drinking water 24 hours prior to and after vaccination. Rinse all waterers with clean water. Do not use disinfectants. Mix vaccine in clean water which contains no sanitizing agents or antimicrobials. Add dry, fat free, powdered milk to the drinking water at the rate of ½ ounce per gallon or 2 grams per liter. Provide ample space for all birds to drink easily. Water containing vaccine should be consumed in 2 hours or less. To assure all birds drink, withhold water for one hour prior to vaccination. Administration through the water lines with a proportioner or medication tank is not recommended.

The label contains complete use information, including cautions and warnings. Always read, understand and follow the label and use directions.
