At Onfido we believe that people are more than numbers. We digitally prove a user’s real identity so businesses can see them for who they are, without relying on databases. We use AI to assess their government-issued ID and facial biometrics. This means they don’t have to compromise on experience, inclusion, privacy or security. That’s how we give companies like Revolut, Zipcar and Orange the assurance they need to onboard customers remotely and securely.

Recognized as a global leader in artificial intelligence for identity verification, we’re backed by TPG Growth, Salesforce Ventures, M12 (Microsoft) Ventures, and others. With 400 employees in 9 offices spread across the globe, we’ve raised over $200M in funding and power verification with established brands worldwide, including CLEAR, Revolut and Expensify.
