
ITEM

5 OTHER FACILITIES

A. The following Company facilities shall be furnished to Telesat from an Earth Station or Telesat Central Office to a Telesat customer's location, within the transmission and provisioning parameters referred to in A. Should such facilities be used to provide Type 2T connections as defined in Item 1, the conditions specified in Item 3 A., B. and C. shall apply. In addition, the interexchange access charge described in Item 4 shall apply in accordance with that item. It is the responsibility of Telesat to inform the Company of the number of such connections. Should Telesat be unable to do so, the Company will assess one interexchange access charge for each facility provided under Item 5, A.1. and 2. following. In the case of Item 5, A.2. following, 24 interexchange access charges shall apply, based on twenty-four 64 kilobit channels.

1. Facilities to provide **64 Kilobits Per Second** transmission capacity between a Telesat Central Office and a Telesat customer's location: The rates, conditions, provisioning procedures and serving areas for these facilities are specified in CRTC 1005, Item 437.

2. Facilities to provide **1.544 Megabits Per Second** transmission capacity between a Telesat Central Office and a Telesat customer's location: The rates, conditions, provisioning procedures and serving areas for these facilities are specified in CRTC 1005, Item 435.
