511 **Emergency Reporting and Alerting Systems**

ITEM

511.1 **Service Description**

Emergency Reporting and Alerting Systems are arrangements to provide a means of warning specific persons that they are needed to deal with an emergency. The warning may be delivered by a priority telephone message, a siren, or by other means.

ITEM

511.2 **Conditions of Service****1. In Alberta:**

- a. An Emergency Reporting System is a fire alarm reporting system used at exchanges where the fire department consists of volunteers and the fire hall is not manned 24 hours per day. The Emergency Reporting System consists of a special one-way Central Office line to the fire hall with parallel stations at the volunteers' premises.
- b. An Emergency Reporting System is limited to six (6) stations but may be increased, at the Company's discretion, to ten (10) stations.
- c. The rate for the Emergency Reporting System includes the initial circuit from the Central Office to the first siren location; however, additional siren circuits are subject to Local Channel Charges (the former TCI General Tariff (CRTC 18001), Item 615, Local Channel Service).

F

2. In British Columbia:

- a. An Emergency Alerting System is a fire alarm system for use in communities where at least one attendant is on duty at the fire hall at all times.
- b. An Emergency Volunteer System is a fire alarm system for use in communities where the fire hall is not manned 24 hours a day. This system utilizes dedicated circuits to each station.
- c. A two-year contract is required for central office relay equipment.
