

Collaborative Health Record

Charting a new course in health for allied healthcare professionals.

TELUS Collaborative Health Record (CHR) reimagines the EMR as a tool that will empower allied healthcare professionals to focus on delivering high-quality, patient-first care. A cloud-based solution with a full suite of tools for collaboration, patient engagement, automation and data optimization, the CHR is the complete digital health platform you'll need to steer your practice into the future.

Run your practice with the CHR.

Get full EMR functionality plus patient engagement tools, and streamlined documentation – all easily accessible by simply logging in.

Helps to efficiently manage billings and get paid easier.

Streamline your billing workflows and claims process with eClaims direct-to-insurance billing and online payment processing right from the CHR.

Streamline patient encounters.

Customize and automate parts of the encounter such as intake, screening, automated forms, imaging requisitions, templates and billing. Patient-submitted data flows into encounter notes so you can focus on care, not documentation.

Get real-time clinical and business intelligence.

Access powerful data for live visibility into every aspect of your practice such as billing and clinic workflows - to help save time and money.

Enhance productivity.

Use patient engagement tools to help lighten administration burden, reduce risk of error with single data entry and save time with templates automatically configured to your needs.

Comply with provincial regulations.

Backed by industry-leading compliance and security best practices of TELUS digital healthcare, the CHR will enable you to maintain your patients' records and protect their personal information in accordance with provincial regulations.

Help ensure patient satisfaction and repeat visits.

Connect with patients through the integrated portal, which includes ebooking, automated reminders and encrypted messaging and online tools for intake assessment.

Say good-bye to paper records.

The CHR will be your single source for managing everything health-related. You can generate, store and access all digital documentation along the patient health journey - from within the CHR.

Fully integrated features for seamless functionality and maximum efficiency.

The CHR is designed to be a complete digital health record solution with features built-in from the ground up.

Patients can stay connected to you and your clinic.

With CHR Connect, patients can manage appointments, exchange encrypted messages with their allied healthcare professional, complete pre-visit questionnaires and more - from their mobile device.

You're passionate about better patient outcomes. So are we.
By working together, we can improve care delivery across the health continuum.
