370 DATA ACCESS SYSTEM

A. GENERAL

Data Access System is a multi-point, multi-drop, four-wire private line used solely for data communications between remote terminals and a central location. The system utilizes Company bridging and associated equipment in central offices.

B. RATES

	<u>Rate Per</u> <u>Month</u>	<u>Service</u> <u>Charge</u>	
1. Data Access Channel Concentration Charge			
Each access line, per customer location	\$130.00	\$100.00 (Note)	A
2. Channels between Central Offices			
The mileage is measured between central offices to the Central Processing Unit via its serving central office, and rated at \$19.31 per 1/4 mile or fraction thereof.			

C. CONDITIONS

1. Data Channel Conditioning charges will apply where applicable in addition to the above rates.
2. Additional charges may apply if unusual costs are encountered.
3. Data transmission is permissive.
4. Effective September 8, 2006, Data Access System will no longer be available to Customers that were not already subscribing to the Service as of that date.
5. Data Access System will continue to be provided for those Customers that subscribed to the Service prior to September 8, 2006.
6. Effective September 8, 2006, a Customer referred to in Item 370(C) (5) may not:
 - (a) request any moves or changes to Data Access Channels provided under this Item as of that date; or
 - (b) request any additional Data Access Channels.

Note: Service charge does not apply when installed at the same time as Multi-Point Anti-Streaming Service (MASS) - Item 401.
