

## Medesync EMR

Helping you deliver specialized psychiatric care to your patients.

When it comes to EMRs, one solution does not fit all. An intuitive, easy-to-use EMR, Medesync is a web-based EMR that's reliable and easy to use with built-in tools to support your psychiatric practice.

### **See complete patient charts at a glance.**

View a patient's summary including family history, risk factors, lab results, prescriptions and drug interactions all in one place. Document new encounters and compare previous symptoms in chronological notes to monitor a patient's health evolution.

### **Improve medication safety and manage patient labs.**

eFax prescriptions to pharmacies and using eRenewal receive and return renewals from your EMR. View drug interactions and side effects, identify patients due for a lab investigation, track test results and see abnormal lab values and previous results.

### **Use standardized assessments to guide patient care.**

Use built-in tools for measurement-based care of depression, anxiety, ADHD and childhood trauma. Support care with embedded external links to clinical guidelines in dynamic forms.

### **Manage referrals and consult letters.**

Customize letter templates adapted for psychiatrists. Quickly send and receive referrals, and efficiently triage and manage them - right in your EMR. Communicate with providers outside your clinic and share encrypted patient records using MedDialog.

### **EMR access on the go.**

Remotely connect to your EMR from a mobile device with the free [TELUS EMR Mobile](#) app. Access patient and clinic information, manage labs, document symptoms and more.

## Bring your EMR to the next level.

Increase your clinic efficiency, integrate powerful EMR add-on tools and engage your patients with Medesync.

### Customize your EMR

Easily customize your patient summary and clinical notes, and create your own electronic forms.

### Manage lab results easily

Pull lab results directly into patient charts for a single view of the patient. You can also view lab and test information over a specified time period.

### Connect with patients

Use the patient portal to securely send individual and group messages. Allow for online pre-visit questionnaires and appointment booking.

### Provider-to-provider communications

Exchange and store unlimited digital and eFax communications with other healthcare professionals with MedDialog.

### Virtual visits

Treat your patients remotely with video visits, access health information and update patient health records simultaneously from your EMR with TELUS EMR Virtual Visit.

### Electronic prescription renewals

Process prescription renewal requests from pharmacists directly from your EMR, and automatically update information in both your EMR and the DSQ.

**Taking care of your patients is your priority. Supporting you is ours.  
By working together, we can improve care delivery across the health continuum.**

Turning information into better health outcomes for Canadians.
