

Medesync EMR

Helping you deliver specialized ENT care to patients.

Designed by a physician and optimized for your ENT or otolaryngology practice, Medesync is a web-based EMR that's bilingual, reliable and easy to use with built-in tools to support you in treating disorders of the ear, nose and throat, and related conditions of the head and neck.

Streamline processes with ENT-specific templates.

Use pre-designed templates for conditions such as allergies, snoring, thyroid disorders and audiology assessments. Templates can be configured, arranged and edited for multiple functions, and can include images for better patient understanding.

Enhance clinic note-taking.

Consult a patient's summary, capture notes, add pictures and fill out forms - all in a single screen. Never lose a note with the autosave function and save time by using checkboxes in custom forms. Create templates for your medications and prescribe multiple drugs from your notes in a single click.

Manage referrals and consult letters.

Send and receive referrals, and efficiently triage and manage them - right in your EMR, using customizable templates adapted for otorhinolaryngology. Share patient records securely between clinics with MedDialog.

Document ENT-related conditions in photos.

Take photos on your phone or tablet with EMR Mobile, add notes and upload them directly to patient files. Monitor patient progress with side-by-side comparison photos of disorders. Choose an image to illustrate visible issues (tumors or deformities of the neck, head and face) and draw or write directly on it.

EMR access on the go.

Remotely connect to your EMR from a mobile device with the free [TELUS EMR Mobile app](#). Access patient and clinic information, manage labs, document symptoms and more.

Bring your EMR to the next level.

Increase your clinic efficiency, integrate powerful EMR add-on tools and engage your patients with Medesync.

Customize your EMR

Easily customize your patient summary and clinical notes and create your own electronic forms.

Manage lab results easily

Pull lab results directly into patient charts for a single view of the patient. You can also view lab and test information over a specified time period.

Stay connected with patients

Use the patient portal to securely send individual and group messages. Save time with online pre-visit questionnaires, patient bookings and automated reminders.

Provider-to-provider communications

Exchange and store unlimited digital and eFax communications with other healthcare professionals with MedDialog.

Virtual visits

Treat your patients remotely with video visits, access health information, upload photos and update patient health records simultaneously from your EMR with TELUS EMR Virtual Visit.

E-prescription renewals

Process prescription renewal requests from pharmacists directly from your EMR, and automatically update information in both your EMR and the DSQ.

Taking care of your patients is your priority. Supporting you is ours.
By working together, we can improve care delivery across the health continuum.
