Payphone Per Call Compensation

ITEM
205.1

Service Description

Payphone Per Call Compensation refers to the assessment of a charge for each call originated from the Company's public or semi-public telephones (pay telephones) for access to an Interexchange Carrier's (IXC's) toll-free dialing sequence.

ITEM
205.2

Conditions of Service

1. The Payphone Per Call Compensation charge applies to the IXC for each completed toll-free call that originates from a Company pay telephone, except in limited situations where the call record cannot be captured by the Company due to technical limitations. The Payphone Per Call Compensation charge shall also be attributed to the Company's own toll-free calls routed over the Company's network.
2. Additional calls initiated through the use of the "next call" key on the pay telephone are also subject to the Payphone Per Call Compensation charge. However, additional calls attained through the use of a dialing sequence on the IXC's platform are not subject to the Payphone Per Call Compensation charge.
3. Calls are considered completed for the purpose of applying the Payphone Per Call Compensation charge when the Company's billing record indicates that the call was answered.
4. Call detail recording is not available. The Company shall provide to the IXC a monthly electronic list of the number of toll-free calls associated with that IXC which were originated from the Company's pay telephones in the previous recording period. However, if requested by an IXC, the monthly data shall be desegregated on a Company originating-exchange basis. The desegregated data shall be available with the first complete recording-period following the receipt of a firm request.
