# **10 reasons why** pharmacists should use Kroll Care Plus, powered by RxVigilance.

RxVigilance is a clinical decision support tool and your ultimate assistant in pharmacological treatment – integrated directly in the Kroll pharmacy management solution.

# Table of contents

1. State-of-the-art profile analysis
2. Intuitive results viewer
3. Extensive clinical documentation 5
4. Succinct patient sheets 6
5. Illustrated auxiliary labels 7
6. User-friendly compounding formulas
7. Tailored pediatric dosages 9
8. Useful calculation tools 10
9. Practical calendar tools 11
10. Unique dressing guide 12

# 1. State-of-the-art profile analysis

No need to exit your pharmacy management solution to obtain a profile analysis and determine the right course of action. RxVigilance's therapeutic advisor analyzes your patient profile in Kroll and generates alerts identifying potential adverse drug reactions.

# Help optimize your workflow and give yourself peace of mind with Kroll Care Plus.

3 alert levels, based on the nature of the clinical intervention required to manage the problem.

/		
		Ì
	Ϊ	ĺ

### Alert level 1

Avoid involved medication. The risk of serious problems outweighs any potential benefit. Alert level 2 If possible, avoid involved medication. If not, adjust therapy to prevent potential problems.

### Alert level 3

Evaluation-specific risk based on the clinical situation. Adjust therapy or monitor as needed.

### **Alert types**

With up to 18 different alert types, Kroll Care Plus is more than just a drug-to-drug interaction checker.

- 1. Drug + drug interaction
- 2. Diagnostic + drug warning
- 3. Allergy / cross-allergy
- 4. Intolerance
- 5. Atypical association
- 6. Additive toxicity
- 7. Age-related drug warning
- 8. Renal failure dosage adjustment
- 9. Dialysis + drug impact

- 10. Dosage / cumulative dosage
- 11. Duplication of medication
- 12. Duplication in therapeutic class
- 13. Laboratory result + drug impact
- 14. Lifestyle + drug interaction
- 15. Medications to avoid
- 16. Pregnancy + drug impact
- 17. Beastfeeding + drug impact
- 18. Colostomy + ileostomy

# 2. Intuitive results viewer

The Kroll Care Plus viewer offers an intuitive interface to navigate through analysis results and easily access additional clinical information specific to your patient profile. **Relevant, timely information so you can make informed decisions.**

### Flexibility

- View the alerts by level, by medication, or by type of alert
- Kroll Care Plus also allows you to view the alerts for the whole patient profile

   or specifically for a targeted drug – directly in Kroll

### Transparency

• At a glance, see the clinical data that was analyzed for your patient

### Accessibility

 Each hyperlink leads directly to additional information, such as product monographs or professional documentation

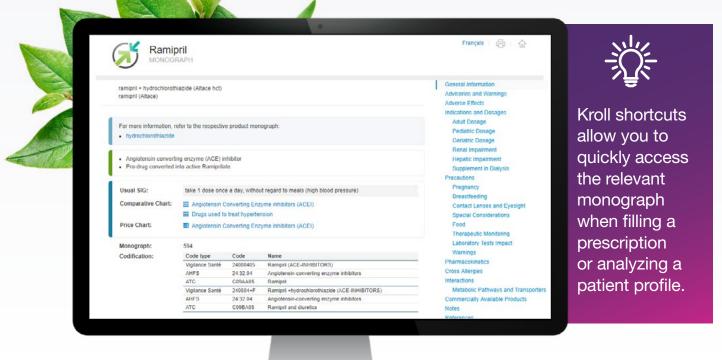

### 3. Extensive clinical documentation

### No more logging into numerous external references to find the answers to your questions.

Pharmacists supporting Kroll Care Plus search the literature and summarize essential information, including:

- Drug monographs
- Canadian manufacturer monographs
- Comparative charts
- Antibiotic therapy guides

- Interaction sheets
- Antimicrobial spectrums
- Clinical guidelines

# 4. Succinct patient sheets

Over 3000 patient information sheets written in a concise and easy-to-understand language, including:

- Medications and illustrated directions for use •
- Medical conditions .
- Travel health •
- Lab tests •

- Nutrition
- Natural products

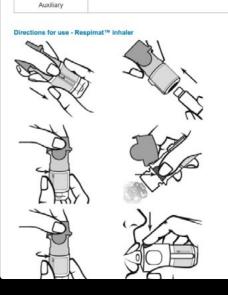

Français | Help | 🔂 | 🏠 | 🕞

EN -

The medication information sheets replace the Kroll Care patient monographs provided by First Databank.

**RxInformationSheets** 

#### Preparing the inhaler for first time use

- Press the safety catch and pull off the clear base. Push the narrow end of the cartridge into the inhaler until you hear a click.
- Put the clear base back into place. Once this is done, the inhaler should not be taken apart.

#### Priming the inhaler

These steps must be followed prior to taking the first dose and when the inhaler has not been used for more than 3 days (Combivent) or 7 days (Spiriva and Inspiolto).

- · Hold the inhaler upright. Turn the clear base half a turn until you hear a click, then remove the protective cap.
- · Point the inhaler towards the ground, press the dose release button and close the cap.

If the inhaler has never been used or has not been used for more than 21 days, repeat these steps until a spray is visible. Then, repeat these steps three more times to prepare the inhaler for use.

#### Using the inhaler

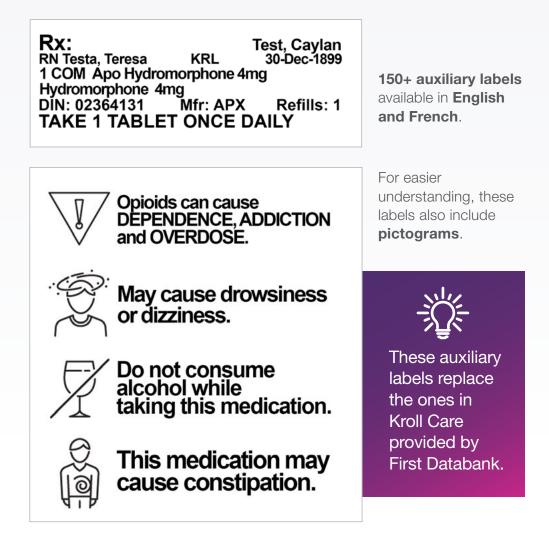

- · Hold the inhaler upright. Turn the clear base half a turn until you hear a click, then remove the protective cap
- Breathe out fully and close your lips around the end of the mouthpiece without covering the air vents.
- As you take a slow, deep breath, press on the release button.
- Continue to breathe in for as long as possible. Hold your breath for 10 seconds or more, if possible close the

# 5. Illustrated auxiliary labels

Count on the team of pharmacists supporting Kroll Care Plus to ensure that the medications you dispense have the relevant auxiliary labels.

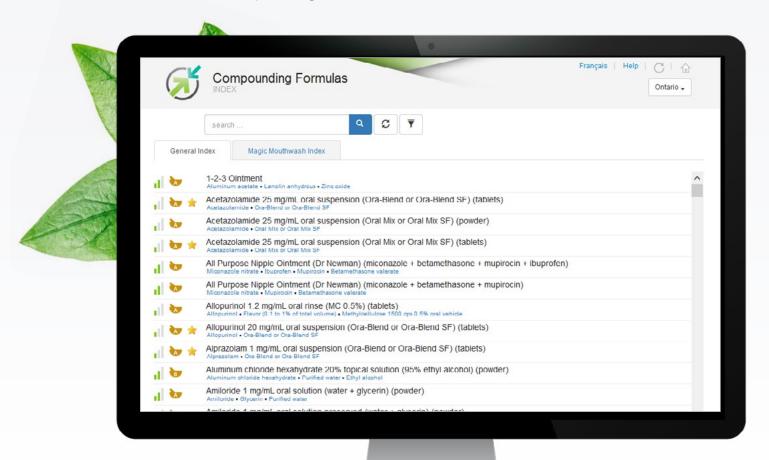

# 6. User-friendly compounding formulas

Quickly access **over 500 master formulas** for non-sterile preparations, based on **NAPRA standards**.

With a wealth of information covering preparation time, required equipment, protocol, final appearance, packaging, stability and much more, compounding will soon become stress-free.

# 7. Tailored pediatric dosages

Simplify the task of calculating doses based on indication, age and weight with the pediatric dosages module.

### Pediatric prescriptions made easy

This module provides weight-based dosing for commonly used pediatric medications. Users can also obtain total quantities required to complete the treatment.

### Indication-based dosing

The module breaks down the total quantities required based on the indication and number of daily doses.

### Customization

Dosing for the most common indications is displayed in the tabs. The dose and number of daily administrations can be customized thanks to the built-in calculator.

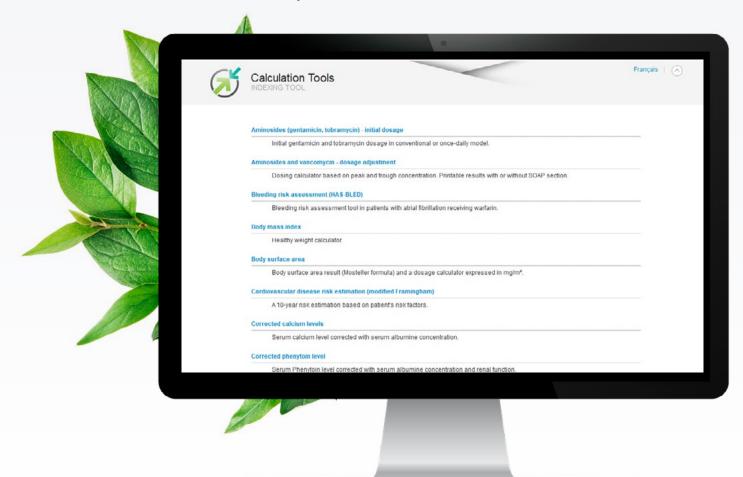

Child's age:       5       years •         See Weight for age 50th percentile table       Q       2         Cephalexin       Q       2         ASN CEPHALEXIN (125MG/5ML SUSPENSION)       ASN CEPHALEXIN (125MG/5ML SUSPENSION)       8.3 mL/dose         AURO CEPHALEXIN (125MG/5ML SUSPENSION)       8.3 mL/dose         AURO CEPHALEXIN (125MG/5ML SUSPENSION)       1652 mg/day         LUPIN CEPHALEXIN (125MG/5ML SUSPENSION)       5 days: 166 mL         10 days: 332 mL       10 days: 332 mL         TEVA CEPHALEXIN (125MG/5ML SUSPENSION)       5 days: 165 mg/day, but the result shown can be different because of roum The duration of treatment Can vary from 5 to 10 days. # 8. Useful calculation tools

RxVigilance's **20 calculation tools** support your clinical practice by helping you save time and prevent calculation mistakes.

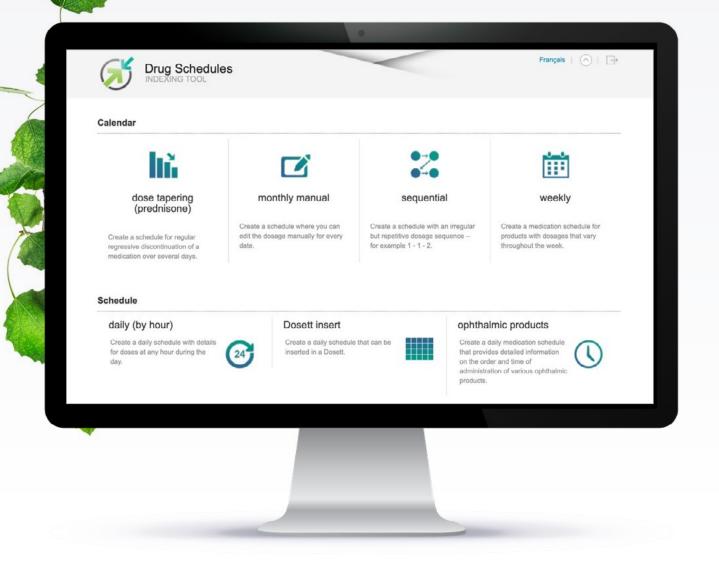

Common calculations include estimation of renal function, cardiovascular disease risk estimation, body surface area, dosage conversion to volume, number of days between two dates, etc.

### 9. Practical calendar tools

Gone are the days of manually creating intake schedules for your patient. Kroll Care Plus offers you **7 tools to automatically generate the schedule** that is just right for your patient.

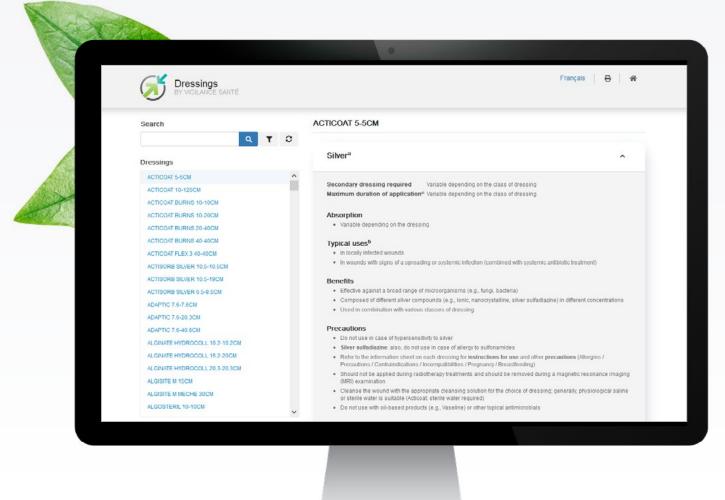

# 10. Unique dressing guide

Find out more about a dressing's characteristics, based on information on its class.

Access information at a glance about the need to apply a secondary dressing, the maximum duration of application, absorption, typical uses, benefits and precautions.

Filter the search by class or combination of classes to view a list of comparable products.

Kroll Care Plus, powered by RxVigilance, is a one-stop shop for your pharmacological information needs, helping you save time, optimize workflows and make informed clinical decisions.

Kroll Care Plus, powered by RxVigilance helps our pharmacists practise to their full scope. Having so many applications and access to the many tools integrated right into your pharmacy dispensing software helps to make this possible. Once they have used Kroll Care Plus,

they don't want to practise without it. - Rita Winn, BScPhm, Pharmacist Director, Lovell Drugs

### About the company behind RxVigilance

Vigilance Santé has been developing its drug databases and clinical decision support tools for more than 30 years and its solutions are relied upon by over 50,000 Canadian front-line health care professionals.

Find out how you can help optimize your patient care with Kroll Care Plus.
