

## **Announcement**

---

**March 24, 1999**  
**No. SIA-7e**

### **Competitive Payphone Identification – BC TEL/TELUS**

---

BC TEL and TELUS Communications wish to announce their method of identifying toll and operator calls originating from competitive payphones.

Depending on the interconnection facility type used, the payphone identification digit will be sent as the ANI I information digit "7" or as an OLI value "07".

**Compatibility Impact:**  
None expected.

**Documentation:**  
Background on payphone identification may be obtained from documentation issued by the Network Sub Working Group of the CRTC Interconnection Steering Committee (CISC) at:  
[http://www.crtc.gc.ca/ENG/PROC\\_REP/TELECOM/1997/general/cisf3d3.htm](http://www.crtc.gc.ca/ENG/PROC_REP/TELECOM/1997/general/cisf3d3.htm)

Further detail is provided in the Network Sub Working Group's Status Report on consensus, File ID: TIRE012 PAL-OSP Signalling.doc.
