4 Coilover

Street Zero-A Coilover

Part No. 3C7 61N CN **Price** \$1,600.00

40-Way Adjustment
Twintube Construction

FRONT Pillow Ball Upper Mount
Pillow ADJ
6Kg/mm (optional spring rate: 5, 7Kg/mm)
Default Low-Down Setting: Front -25mm
Max Ride Height Range: -30 mm to 0 mm

REAR H/D Rubber Upper Mount
5Kg/mm (optional spring rate: 4, 6Kg/mm)
Default Low-Down Setting: Front -20mm
Max Ride Height Range: -30 mm to 0 mm

PRODUCT INFORMATION

The Street ZERO-A features a full height adjustable system enables the perfect ride height adjustment without sacrificing damper stroke or spring preload. The newly developed 40 way adjustable Twin Tube shock absorber system enables a wide range of suspension setting suitable for virtually any given road condition.

5 Suspension

Front Sway Bar

Part No. 3C4 311 A30 Price \$427.00

PRODUCT INFORMATION

* For Type-R only

OE OD=29.2mm Solid / CUSCO OD=30mm Solid. (+31% increase) Bushings included.

Tech Tip : It may require to drop front sub-frame for removing OE sway bar and installing CUSCO Sway bar.

Material : High Strength Steel Solid

Rear Sway Bar

Part No. 3C4 311 B22 Price \$374.00

PRODUCT INFORMATION

* For All Civic Models, and 2018 + Accord

OE (Type R OD=20.0mm solid / Si OD=18.5mm solid / Accord OD=16.5mm solid) (CUSCO OD=22mm solid) (+31% increase / variable) Bushings and brackets included.

Material : High Strength Steel Solid

6 Strut tower Brace

Type - OS / Front NACA Duct Contour Style

Part No. 3C4 540 A Price \$200.00

PRODUCT INFORMATION

Type-R - NACA Duct Contour Style

Exclusively designed for FK8 Civic Type R to clear the NACA duct air passage under the hood.

CUSCO STRUT TOWER BAR is designed to increase chassis strength, eliminate body flex, vibrations in order to optimize the vehicle's handling. Beautifully crafted and anodized in CUSCO Blue for lighting up the engine bay. It uses existing mounting location for "bolt-on".

Type - OS / Straight

Part No. 3C3 540 A Price \$200.00

PRODUCT INFORMATION

For All Civic models except Type-R - Traditional Style Bar

Designed for Non Type-R Civic models / it does NOT fit on Type-R model.

Material : High Strength Steel Bracket + Aluminum Oval Shape Bar

CUSCO STRUT TOWER BAR is designed to increase chassis strength, eliminate body flex, vibrations in order to optimize the vehicle's handling. Beautifully crafted and anodized in CUSCO Blue for lighting up the engine bay. It uses existing mounting location for "bolt-on".

Strut Tower Bars eliminate chassis flex at the most vital area of the car - between the strut towers, essentially to prevent the misalignment of suspension mounting points experienced during high cornering loads. The end result is the suspension performing at its intended optimal condition with the suspension geometry in tact.

The CUSCO brand Strut Tower Bars not only provides flawless fitments, but are engineered inside and out. The interior of the hollow shafts are carefully designed so that the bars are kept lightweight while providing the most rigid strength.
