Home Energy Management setup guide.

Connecting your energy tech to the grid.

Once all of your new energy tech is up and running, it's time to connect it to the grid. You do this through your GridX box, which has already been configured for your home, to make this final step quick and easy.

1. First, download the E.ON Next Home app from the App Store or Google Play Store and use it to log into your E.ON Next account.

   Download on the App Store | GET IT ON Google Play

2. Unpack the box. Inside, you should find your personal GridX box, and a power supply.

3. Find your 9-digit start code on the bottom of the unit. You may need this during activation.

4. Find the pre-installed LAN cable from your wall socket, and plug it into the GridX box.

5. Insert the power cable into the GridX box plug it in at the socket and turn the wallswitch on. The power light will come on after a few seconds.

6. Open the E.ON Next Home app on your mobile device and follow the simple steps to connect all of your home's energy assets to Home Management.

7. That's all there is to it. But if you're having any problems, you can call Home Confidence support on **0808 501 5200**, and our friendly experts will be happy to help.

Congratulations. Your Lower Bills Built In home should now be fully operational and connected to the grid. Welcome to Home Confidence from E.ON Next.
