Work experience

Fullstack Developer   Sep 2023 - Current

Retorio

React - TypeScript - zod - Jest - ChakraUI - Google Cloud - Azure - MySQL - Prisma - Knex - monorepo

- Planned the implementation of new core features end-to-end, and led the team until it was delivered
- Improved the productivity of code reviews by adding PR previews, better PR rules, and improving the linting process to catch more issues beforehand
- Increased the agility of the team by driving the discussions to a result and improving knowledge distribution.
- Reported, prioritized, and solved big tech-debts
- Implemented OpenAPI spec generation using Zod on the backend

Senior Frontend Developer   Aug 2022 - June 2023

HASH

React - Next.js - TypeScript - GraphQL - Playwright - Material UI - Canvas API - ProseMirror - OpenAI API - dnd kit - Framer Motion - monorepo

- Worked on the two open-source monorepos called Block Protocol and HASH.
- Implemented some core features of HASH, including nested JSON schema entity editor using a custom canvas-based data-grid
- Extended glide-data-grid with new features (e.g. interactive canvas cells)
- Created multiple block-protocol components (e.g. Kanban Board, with advanced debounce queuing)

Frontend Developer   Nov 2021 - Aug 2022

Cleevio

React - Next.js - TypeScript - GraphQL - Contentful - Storybook - SWR - Sentry

- Developed multiple core features end-to-end for the GoodTrust project like Singing Portraits & Medical Directive, which has more than 100k users.
- Refactored some of the codebase to improve maintainability, and keep up with the best coding practices.
- Wrote articles on software development to increase brand awareness.

Frontend Developer   Mar 2021 - Nov 2021

Modus Create

React Native- TypeScript - Redux - RTK - Storybook - SWR - Reanimated

- Developed a podcast listening app empowered with social features. Personally developed some core features like messaging, reels, comments, custom Instagram story builder
- Contributed to design with UI-UX suggestions.
- Implemented smooth animations & interactions using Reanimated

Frontend Developer   May 2020 - Mar 2021

Lean Scale

React - Redux - Next.js - Express - Sass - Cypress - React Hook Form - Lokalise - NextSEO - Jenkins - Zeplin - Gitlab

- Developed la3eb.com in 2 months with a team of 3 people. Including developing an unit-tested UI library.
- Led a frontend team of 5 people for 4 months on a food-ordering platform (Provided them with sprint planning, knowledge distribution, communication between teams, worked closely with PMs & designers)

Frontend Developer   Jul 2019 - May 2020

Metrobi

React - React Native - MobX - Ant Design - Less - styled-components - Firebase - Stripe - AWS - Moment.js - Expo - Zeplin

- Developed the mobile application from scratch in 10 weeks. The app uses live location data which enables the drivers to choose the delivery that suits them and follow the route optimized for delivery.
- Developed dashboard for delivery tracking, billing, KPI tracking, driver management, etc.

React Native Developer   Apr 2018 - Jul 2018

Kodnet Mobile

React Native - IAP - AdMob - react-native-svg-charts - react-native-navigation

- Developed an Instagram account analysis application.

Education

Computer Engineering   2015 - 2019

Yıldız Technical University

Participated in IEEE courses and activities.

Projects

- **Manchmark**

React-Native - Express - Node.js - MongoDB - Mongoose - AdMob - react-native-interactable - react-native-navigation - Postman

Manchmark is a mobile game on Google Play where players compare their skill levels with other players in 6 different mini-tests. Node.js server with MongoDB is used in the back-end to store and process user scores.

- **Narmoni**

React Native - MobX - Firebase - Algolia - react-navigation

A shopping assistant application to compare prices between markets and optimize shopping lists to save money.

- **MenuPratic**

React Native - Expo - Firebase - MobX - Bitbucket Pipeline - react-navigation

A QR code menu application to give orders in restaurants. Used bitbucket pipeline to start expo builds. Developed an Instagram-like story component for restaurant offers & announcements. Released on App Store.

- **Countime**

React - Firebase - CircleCI

An online & shareable countdown timer. Timers are on the cloud, so you use the same timer cross-device.

- **Personal Portfolio**

React - Next.js - Sass - Framer Motion - Vercel - Figma

My portfolio. Used Framer Motion for page transitions and Vercel for hosting. Design is made by me with Figma.
