

24 November 2015

Norsepower has delivered second Rotor Sail unit to Bore's M/V Estraden

Norsepower has at 23 November 2015 installed another Rotor Sail unit on board Bore's Estraden. The installation was made at Rotterdam Europort during a normal harbor stay. It took only five hours to install the Rotor Sail on a readymade foundation and to make it entirely operational.

M/V Estraden is now equipped with two 18m x 3m Norsepower Rotor Sails, which have a maximum output of 2MW of main-engine equivalent auxiliary wind propulsion power. The latest photos of the two-rotor installation on board Estraden can be found at <http://www.norsepower.com/rotor-sail-solution/Reference%20installation>

About Norsepower

***Norsepower Oy Ltd** is a leading Finnish marine engineering company specializing in clean tech solutions within the marine sector. Norsepower's vision is to become the global market leader in cargo vessel auxiliary wind propulsion systems.*
