About Stanwell

Stanwell is Queensland's leading provider of electricity and energy solutions to the National Electricity Market, and large energy users along the eastern seaboard of Australia.

With over 40 years of continuous operations, Stanwell's experience in working with communities to build, operate and maintain reliable energy generation assets is also being applied to the rollout of renewable energy.

Stanwell is developing a pipeline of renewable energy and storage projects throughout Queensland, whilst maintaining a reliable supply of baseload power from two of the most efficient and reliable coal-fired power stations in Australia – the Tarong power stations near Kingaroy and Stanwell Power Station near Rockhampton.

Stanwell acknowledges the traditions and cultures of First Nations people, and recognises their continuing connection to land, water and community where we live and work. We respect and honour their Elders, past, present and emerging, and we commit to providing the spark for a bright future together.

We place a high priority on working with suppliers whose sustainability frameworks and commitments support ours.

Through our procurement activities, we have the ability to create transformative economic opportunity for business in the regions where we operate. Recognising the impact our procurement activities can have on building our communities' economic resilience, we apply local benefits tests to all our significant tenders and seek opportunities through our tendering process and category planning to prioritise Queensland businesses.

Our Sustainable Procurement Framework:

Responsible procurement

We aim to procure on a value for money basis - creating lasting benefits and promoting fair and ethical behaviour.

Environmentally conscious

We prioritise working with suppliers who are making a positive environmental impact aligned with our sustainability approach.

Buying local

We support Queenslanders and local communities by prioritising buying local.

Encouraging supplier diversity

We seek to create more opportunities for economic and employment participation, for all Queenslanders.

Supporting host communities and First Nations businesses

We are doing our part to help close the gap by supporting First Nations businesses and local businesses in host communities.

How to engage with Stanwell

Stanwell purchases goods and services in accordance with the “Buy Queensland” approach, comprised of the Queensland Procurement Strategy 2023 and Queensland Procurement Policy 2023.

All our procurement activities are conducted transparently, ethically, honestly and with fairness to all parties.

Register on the Zycus portal - be visible to our business

The Zycus Supplier Network is the primary interface to interact with us. Registering on the portal is the first step toward exploring opportunities. Whether you're offering goods, services, or specialised expertise, we welcome your interest and invite you to register and become part of our network. Stanwell will generally invite tenders, proposals, quotes and expressions of interest from the supply market, via Zycus.

Visibility of full open market tenders

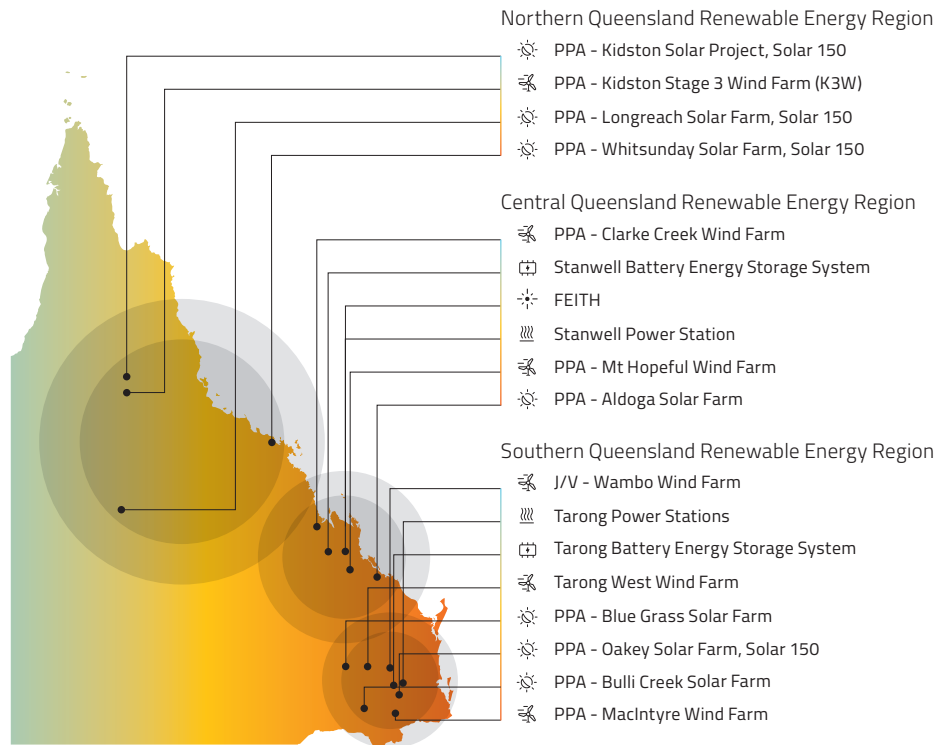

Where this is required, our open market tenders are advertised on VendorPanel for wider outreach.

Do you have an innovative solution for us? With the sheer number of excellent products, services and innovations in our industry it is hard to keep up with new supply options. You can email us direct on supply@stanwell.com for further direction.
