

# Eclipse<sup>®</sup> Cast Lip for 350T to 800T machines

Lighter without compromising strength and durability.

## Our new streamline design features:

Simulations across a range of machines indicate up to a 3% reduction in fill power required

Up to 1 tonne mass reduction.  
\*subject to cast lip size

Predicted increase in service life of up to 50%.

Improved bucket fill performance and cycle times

Improved design to extend maintenance intervals

Extensive range of GET options to suit your operational needs

*Wear caps provide protection and extend service life.*

*Improved adapter design to reduce nose maintenance from uneven wear and general nose peening.*

*Optimised nose angle to increase 'cutting clearance' and 'toe access' to reduce fill energy required.*

*Our GET system and streamline lip reduces the effort required of the operator to fill the bucket, helping achieve the target payloads and cycle times consistently.*
